

Help Employees Work Smarter and Offer More Flexibility with Mobile-Centric Technology

Today's employees want tech tools that allow them to work, communicate, and be successful without being tethered to a desk.

And for industries with non-desk employees, staying connected is key for employee morale, retention, performance and accountability.

That's why Engage by Cell's mobile web authoring platform and text messaging tool provide a massive productivity and communication boost to many business processes.

When will the new product launch?

June 20. We will send more information including resources and a demo page. Stay tuned!

TEXT CHAT

Employees will always have questions that your website does not answer. Engage by Cell's two-way Text Chat allows you to answer questions/concerns via text at any time, from any location.

ONBOARDING

Create a seamless onboarding experience with a mobile task management app with links to new hire forms, training content and more. Gamify the onboarding experience with leaderboards.

Plus, with our text messaging platform, you can segment mass communication to specific groups of new employees or chat directly with individuals.

TRAINING

With today's shortened attention spans, employees retain more from short, three-to-five-minute learning bursts, perfect for mobile. Our mobile training platform includes:

- No limits on content: videos, audio files, PDFs, presentations, images, etc.
- Robust reporting and analytics for training content usage
- Text messaging tools for drip learning or training reminders

Mobile empowers learners to work on their own time, on their own terms.

Be ready for all the ways people want to pay.

DATA COLLECTION

Want to take the pulse of employee morale? Do your employees like your benefit plans? Through our mobile web app builder, you can survey employees and collect information, gather useful feedback, and survey your employees.

Just send your team a text or email with a link to your mobile page. Then, review submissions in real time in the reporting dashboard.

WORKFLOWS

Our mobile web authoring platform will help you automate processes, saving time and space in your employees' email inboxes.

- Create task checklists
- Automate approvals
- Receive notifications via text message

AND HERE'S THE BEST PART!

- No IT department needed
- No downloads required
- Changes made in real-time
- Easy-to-use, drag and drop platform
- Unlimited administrative users
- Unlimited employee lists

It's a no-brainer. Mobile technology heightens engagement.
