## Skills

Web design

Interaction design

Prototyping

UX Design

## Software

Sketch

Webflow

XD

Framer

Figma

## Microsoft | Web design • Prototyping

- | Designed mockups for new and old pages, collaborating with stakeholders, utilizing a first-ever atomic M365 asset library I had built in Sketch, optimizing workflow and ease-of-use.
- | Redesigned headlining product pages such as Outlook, Word, and Teams, collaborating with team members and the creative director, iterating the design for 3 weeks before building and deploying a working prototype into official user-testing, then utilizing feedback for a second round.
- | Developed high-fidelity, working prototypes of redesigned product pages using Webflow to go into official user-testing, and additionally designed and developed key interaction animations.
- | Lead efforts to develop more systematic approaches to designing pages and sourcing assets.

## Luca Casa | Web & UX design • Webflow development

Luca Casa is a residential and commercial interior design agency based in LA.

- | Made user-flows and wireframes, discovering page layout options, collaborating with the owner to understand and improve the user experience.
- | Designed and deployed unique element interactions and motion designs to distinguish an airy, modern style of interior design services offered.
- | Solely designed a working prototype, then developed a full-fledged working website.

## Betterbank | Web design • Creative direction • Webflow development

Betterbank is a digital banking service that offers medical financial assistance.

- | Designed website and sitemap in many iterations, exploring different styles, strategies, and user-flows, collaborating with internal team members and external artists.
- | Designed and deployed assets including icons, card designs, UI mockups, and device mockups.
- | Played a key role in content strategy and product design by having a hands-on approach to the entire user-experience and digestibility of the product.
