EcoHome / United Power Solutions | UI Design • Product Design

Solar and energy efficiency company based in Las Vegas

- ◆ Designed web app for internal sales team with the functions of tracking sales, auditing home energy usage, and generating reports.
- ◆ Redesigned customer-facing sales presentation, energy report, and solar-usage calculator, improving user experience by reenvisioning information hierarchy and relevancy.
- ◆ Designed iOS app interface for internal sales team with similar functionality to web app.
- ◆ Collaborated with stakeholders, sales, and operations along the way, gaining perspectives among differing teams.

Microsoft - M365 | UX Design • Prototyping • Motion Design

- ◆ Designed mockups for new and old webpages, collaborating with stakeholders, utilizing an atomic M365 asset library I had built in Sketch, allowing for a more systematic and efficient workflow.
- ◆ Redesigned headlining product pages such as Outlook, Word, and Teams, collaborating with team members and the creative director.
- ◆ Developed high-fidelity, working web prototypes of Outlook and Word to go into official user-testing, and additionally designed and developed key motion and interaction animations.

Luca Casa | Motion Design • UX Design • Webflow Development

Residential and commercial interior design agency based in Los Angeles

- ◆ Made user-flows and wireframes, discovering page layout options, collaborating with the owner to understand and improve the user experience.
- ◆ Designed and deployed unique element interactions and motion designs to distinguish an airy, modern style of interior design services offered.
- ◆ Solely designed a working prototype, then developed a full-fledged working website.
