Kupondol, Lalitpur

# The accounting and business landscape is undergoing a fundamental transformation.

Traditional compliance-led practices are increasingly being complemented and in many cases redefined by digital tools, intelligent software, and data-driven decision-making. Reliable financial data has become a strategic asset that influences lending decisions, business growth, operational efficiency, and long-term sustainability.

As businesses, accounting professionals, and financial institutions adapt to this shift, there is a growing need for informed dialogue around the future of accounting, the role of trustworthy digital financial data, and the impact of emerging technologies such as artificial intelligence on business operations.

TiggCon 2026 is designed as a focused, high-level forum to bring together professionals from the accounting and business ecosystem to explore these themes, exchange perspectives, and build a shared understanding of where the profession is headed.

## The primary objective of TiggCon 2026 is to provide participants with strategic insights

Into the future of accounting and business operations, with a particular focus on:

The role of reliable, digitally verified financial data in building trust across the financial ecosystem

The evolving role of accounting firms beyond compliance into continuous business services

The impact of AI-led software and intelligent systems on business workflows and decision-making

The event aims to foster informed discussions, encourage critical thinking, and enable participants to better prepare for the next phase of digital and professional transformation.

## TiggCon 2026

Where Trust, Intelligence and Growth Converge

Building Trust

Exploring the role of reliable digitally verified financial data in building trust across the entire financial ecosystem.

Harnessing intelligence

Mr. Suman Pokharel

## Trust as Collateral:

### The Future of Lending Powered by Reliable Financial Data

This session will explore how data-driven credit models are reshaping lending practices, and how digitally verified accounting data can enhance trust, transparency, and scalability in bank-borrower relationships.

As a **Practicing Chartered Accountant and Partner** at **S. R. Pandey & Co.**, Mr. Raut possesses extensive expertise in audit, financial advisory, and the implementation of accounting standards, and is a recognized leader in Nepal's professional accounting community.

## Driving Growth in Accounting Firms:

### From Compliance to Continuous Business Services

This session will examine how accounting firms can move beyond traditional audit and tax functions to offer continuous services such as bookkeeping, reporting, and ongoing financial support, enabling sustainable growth and deeper client engagement.

CA. Arun Raut

Mr. Ghimire is the **co-Founder of Rara Labs** and seasoned technology leader with deep expertise in enterprise software development, backend architecture, and engineering education.

## When Software Thinks:

### The AI-Led Transformation of Business Operations

This session will discuss how AI-led systems are transforming software from simple automation tools into intelligent operational partners, reshaping business workflows, decision-making, and scalability.
