

PROACTIVE ANTITRUST COMPLIANCE FOR CHIEF LEGAL OFFICERS

Know your blind spots and take action.

YOUR WORK IS VITAL TO THE SUCCESS OF YOUR BUSINESS

As the Chief Legal Officer, you play a vital role in your organization. This includes an ever-increasing workload around compliance and ethics. According to the Association of Corporate Counsel's 2022 *Chief Legal Officer Survey*, 80% of CLOs oversee other critical business functions like compliance and ethics.

WHAT IS LITLINGO?

LitLingo is a secure compliance assurance solution that connects to your existing chat and email services, detects careless communications, and prevents harmful messages from being sent, all in real-time.

“But corporate culture matters. A corporate culture that fails to hold individuals accountable, or fails to invest in compliance — or worse, that thumbs its nose at compliance — leads to bad results.”

-Deputy Attorney General Lisa O. Monaco gives Keynote Address at ABA's 36th National Institute on White Collar Crime Washington, DC ~ Thursday, October 28, 2021

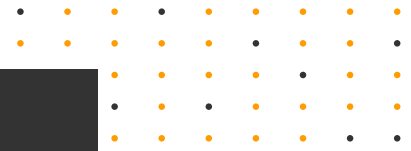

ANTITRUST VIOLATIONS COST BUSINESSES BILLIONS OF DOLLARS PER YEAR

Between 2009 and 2020, businesses paid 27.6 billion dollars in class action settlements for antitrust violations. With the increase of private and government antitrust cases costing businesses billions of dollars per year, including possible jail time for individuals involved, it's more important than ever to build a proactive compliance program to prevent and detect careless communications.

HOW CAN YOU PREVENT AND DETECT CARELESS COMMUNICATIONS BEFORE THEY BECOME HARMFUL TO YOUR BUSINESS?

According to the U.S. Department of Justice, an effective antitrust compliance program aims to prevent and detect violations. One of the core factors the Antitrust Division prosecutors consider when evaluating the effectiveness of an antitrust compliance program is employee training and communication.

“An effective antitrust compliance program will include ***adequate training and communication*** so that employees understand their antitrust compliance obligations.”

With LitLingo's antitrust compliance solution, you can detect and prevent harmful communications before it becomes damaging to your business. LitLingo's proprietary technology uses an increasing list of artificial intelligence, machine learning, and natural language processing techniques to understand words and phrases, syntactic structure, and semantic relationships present in communications. This allows you to understand the meaning of language rather than rely on keyword searches. The result is a robust and effective detection and prevention solution that enables real-time monitoring and automated in-the-moment employee training.
