

THE HOME THAT SCIENCE BUILT

BKC Builder Partnership Program

April 20, 2026

BKC Builder Partnership Program Vision

New initiative designed to:

- Deepen relationships with / between participating builder clients (“Builder Forum”)
- Create opportunities for shared learning and collaboration
- Provide builders with a platform to exchange insights
- Help BKC better understand how to support builders operationally and strategically

Why This Program Matters

- Builders operate in an increasingly complex regulatory and market environment
- Continuous collaboration helps identify emerging challenges earlier
- Strong partnerships allow BKC to better align services with builder needs
- Opportunity to create a trusted forum for industry dialogue

How It Works

Core program element: **Builder Partnership Exchanges**

- Small roundtable sessions hosted at the BKC office
- Grouped with non-competing builders
- Breakfast-format collaborative discussions
- Focus on relationship building, collaboration, and discovery

Discussion Themes

Each session will explore:

- Where operational friction exists in current workflows
- Areas where collaboration across builders may benefit the industry
- Opportunities for new services or support (how else can we help?)
- What builders value most about working with BKC

Expected Outcomes

For Builders:

- Opportunity to exchange insights with peers
- Expert technical insights from BKC

Allows BKC to:

- Gain clear understanding of evolving builder needs
- Develop stronger partnerships and trust
- Guide service development and continuous improvement to better serve the homebuilding industry (you!)

What value will this bring Builders?

Business:

- Reducing construction costs & complexity
 - Framing layout reviews
 - Optimized energy and HVAC design with enclosure design
- Increasing energy-efficiency (code reviews)

Personal:

- Peace of Mind
- Community
- Relief of personal pressure

Call to Action...

My ask is this. If...

- You're a builder
- You're facing increased complexity and regulatory challenges
- You want to be in the room with technical and fellow builder knowledge
- You value peace of mind

Then...
