

OFFSHORE WIND – WIND STUDY QUERIES AND COMMENTS

1. Is there a preference for the redundancy to be deployed in or around the proposed wind farm area (to maximise data accuracy), or on land (to maximise data continuity and safety)?

The RA does not prescribe the parameters of technical solution. Bidders are expected to propose a solution, including the redundancy.

2. What currency would payments be made in, USD or BMD?

US Dollars.

3. The deployment is expected to begin in Q1 2027. Is there an expected start date/ timeframe for the pre-deployment work to begin?

The RA expects bidders to put forward project plans that cover mobilisation and pre-deployment work.

4. If possible, it might be useful to extend the queries deadline into October. Further queries may arise as teams bespoke their bids for a Bermuda deployment.

The RA will open a second round of clarifications and will share the timeline on its website. Bidders are invited to compile and submit any further queries they may have
