Build every operation for resilience alongside innovative partners.

Mitigate business risks.

Minimize your carbon footprint.

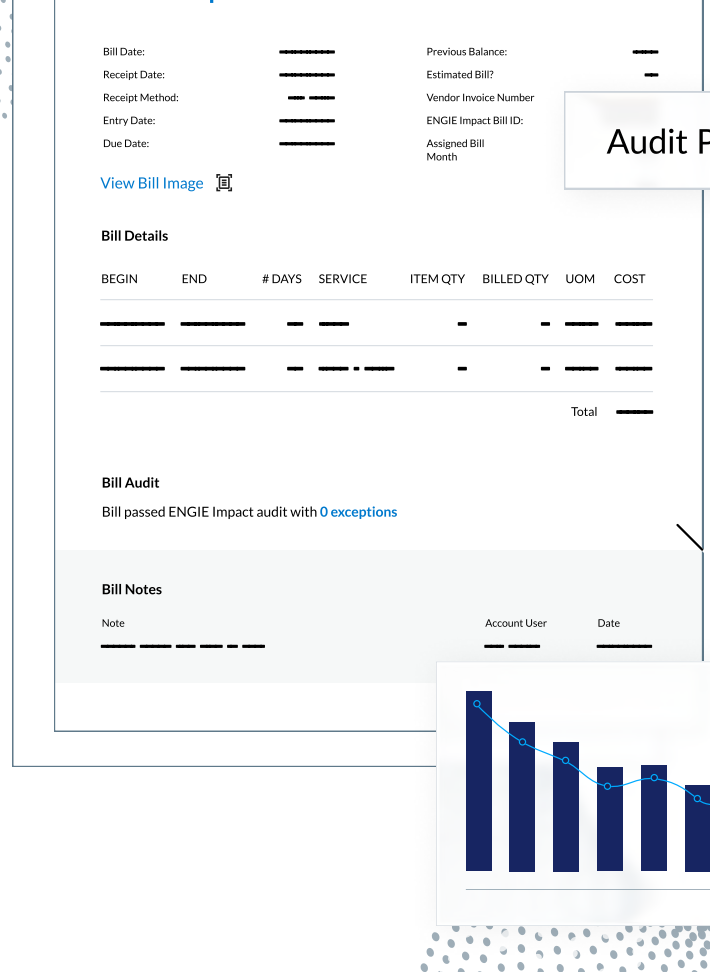

Optimize every utility dollar.

Your organization's journey is unique, we provide expertise and support to make it easier.

[Find Out How](#)

Capture Your Data & Control Expenses

With centralized data, you'll always have a good grasp on cost and usage details, allowing you to see, track, and access your portfolio's performance, and manage risk.

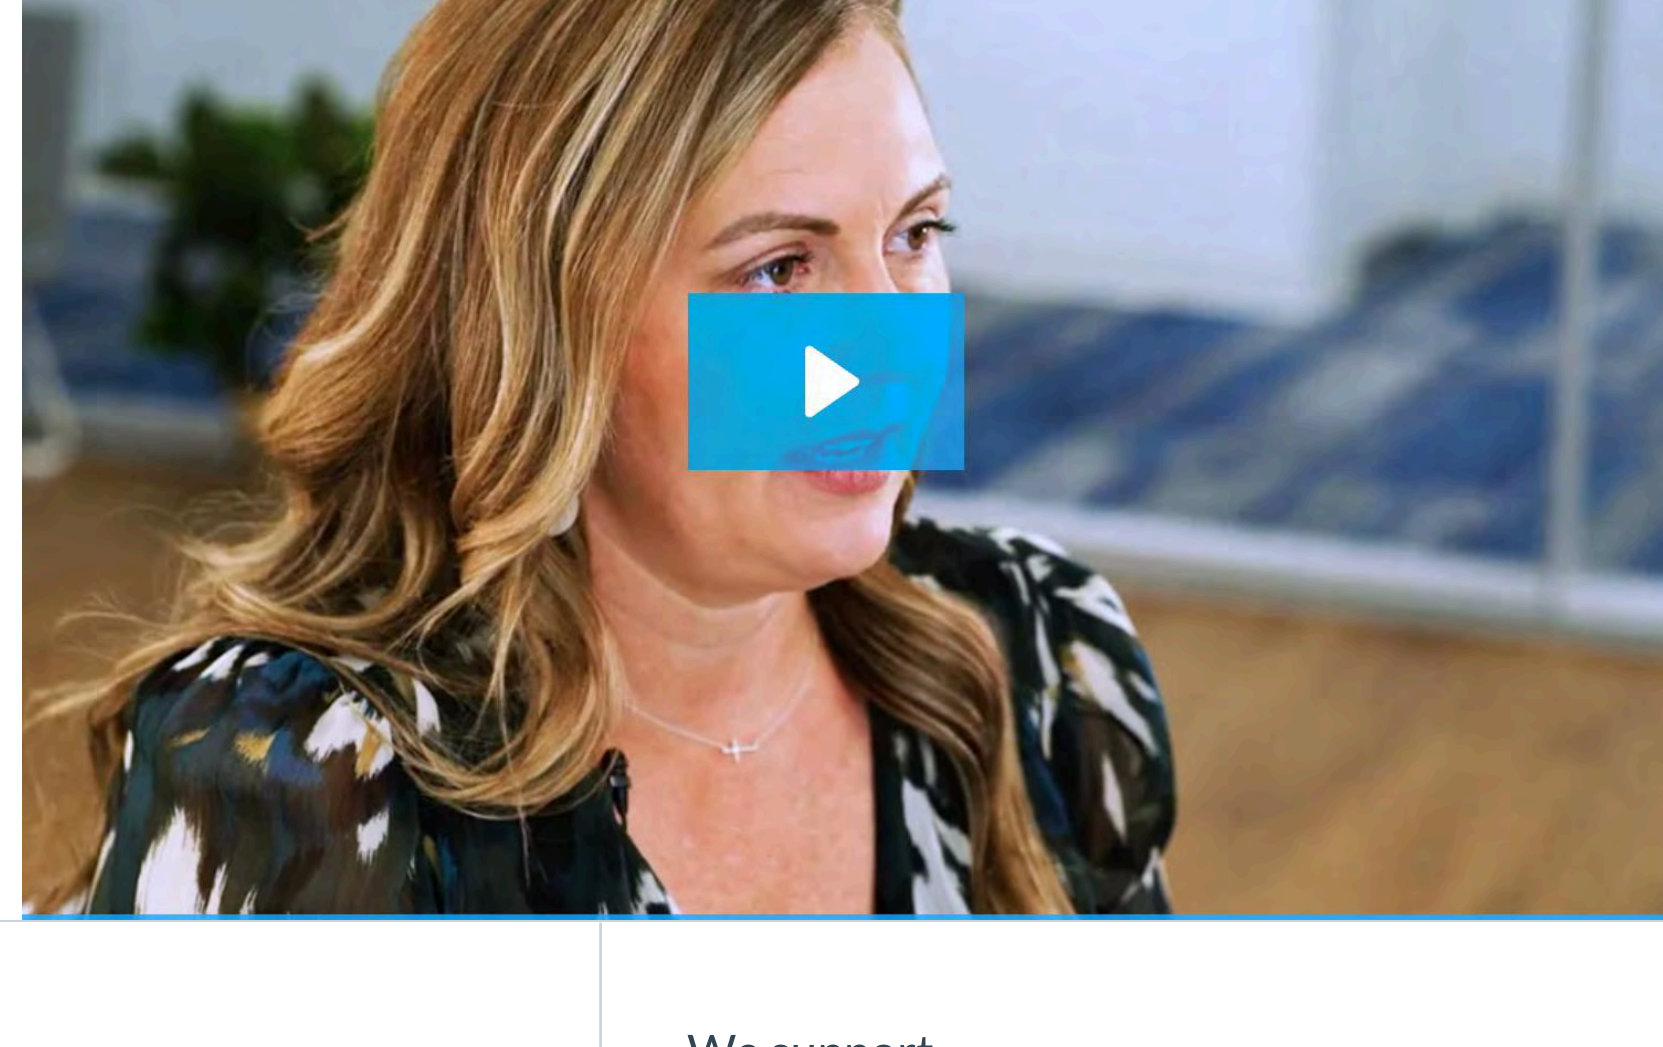

Keeping track of utility, waste, water, telecom, and carbon data for multi-site portfolios gets complicated quickly, and without visibility into your resource management, the consequences can be expensive. In 2025, The Kaplan Group surveyed 100 financial leaders and found that the overwhelming majority reported revenue loss due to late bill payments. Some companies even cited 10% of their annual revenue lost.

Optimize Your Operations Using Data-Driven Strategies

Optimizing your resources is crucial to build resilience, lower your risk, reduce your carbon footprint, and meet your goals, all with a foundation of accurate, centralized data.

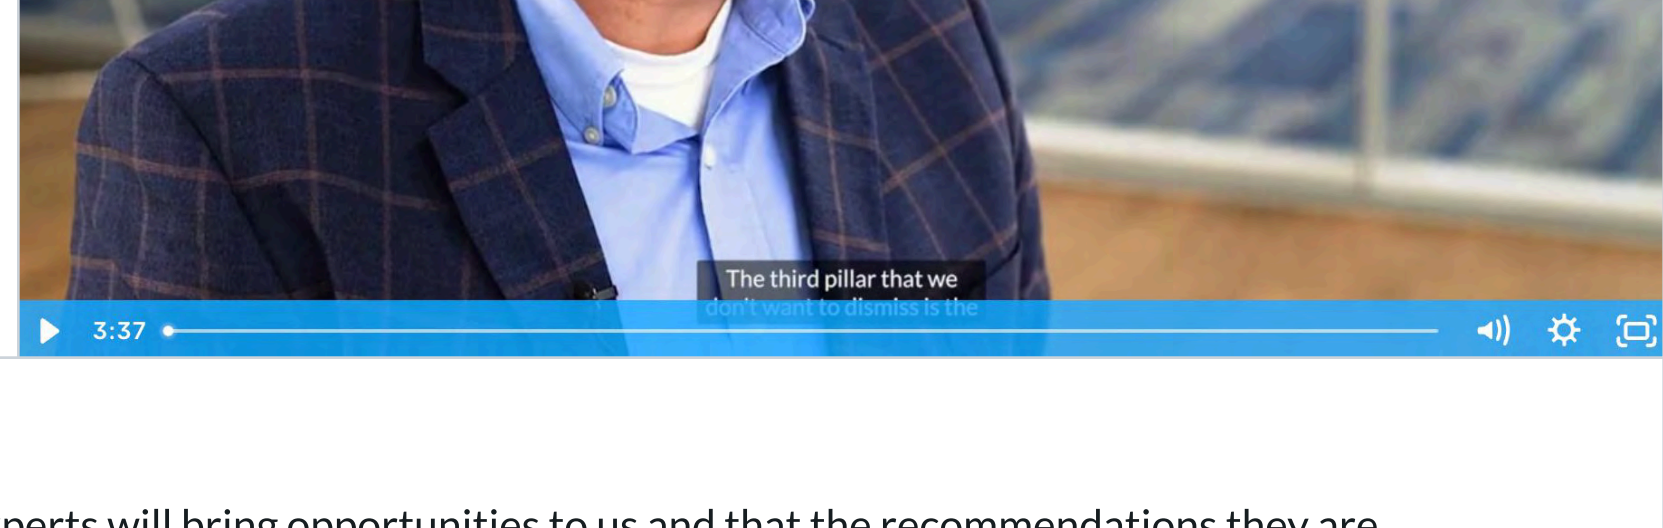

30% of companies' energy use is wasted through controllable inefficiencies, according to the U.S. Department of Energy. We've saved our clients an estimated \$22B per year.

With a solid understanding of your data, you can build strategies to drive measurable reductions in both usage and operational expenses.

[Learn More](#)

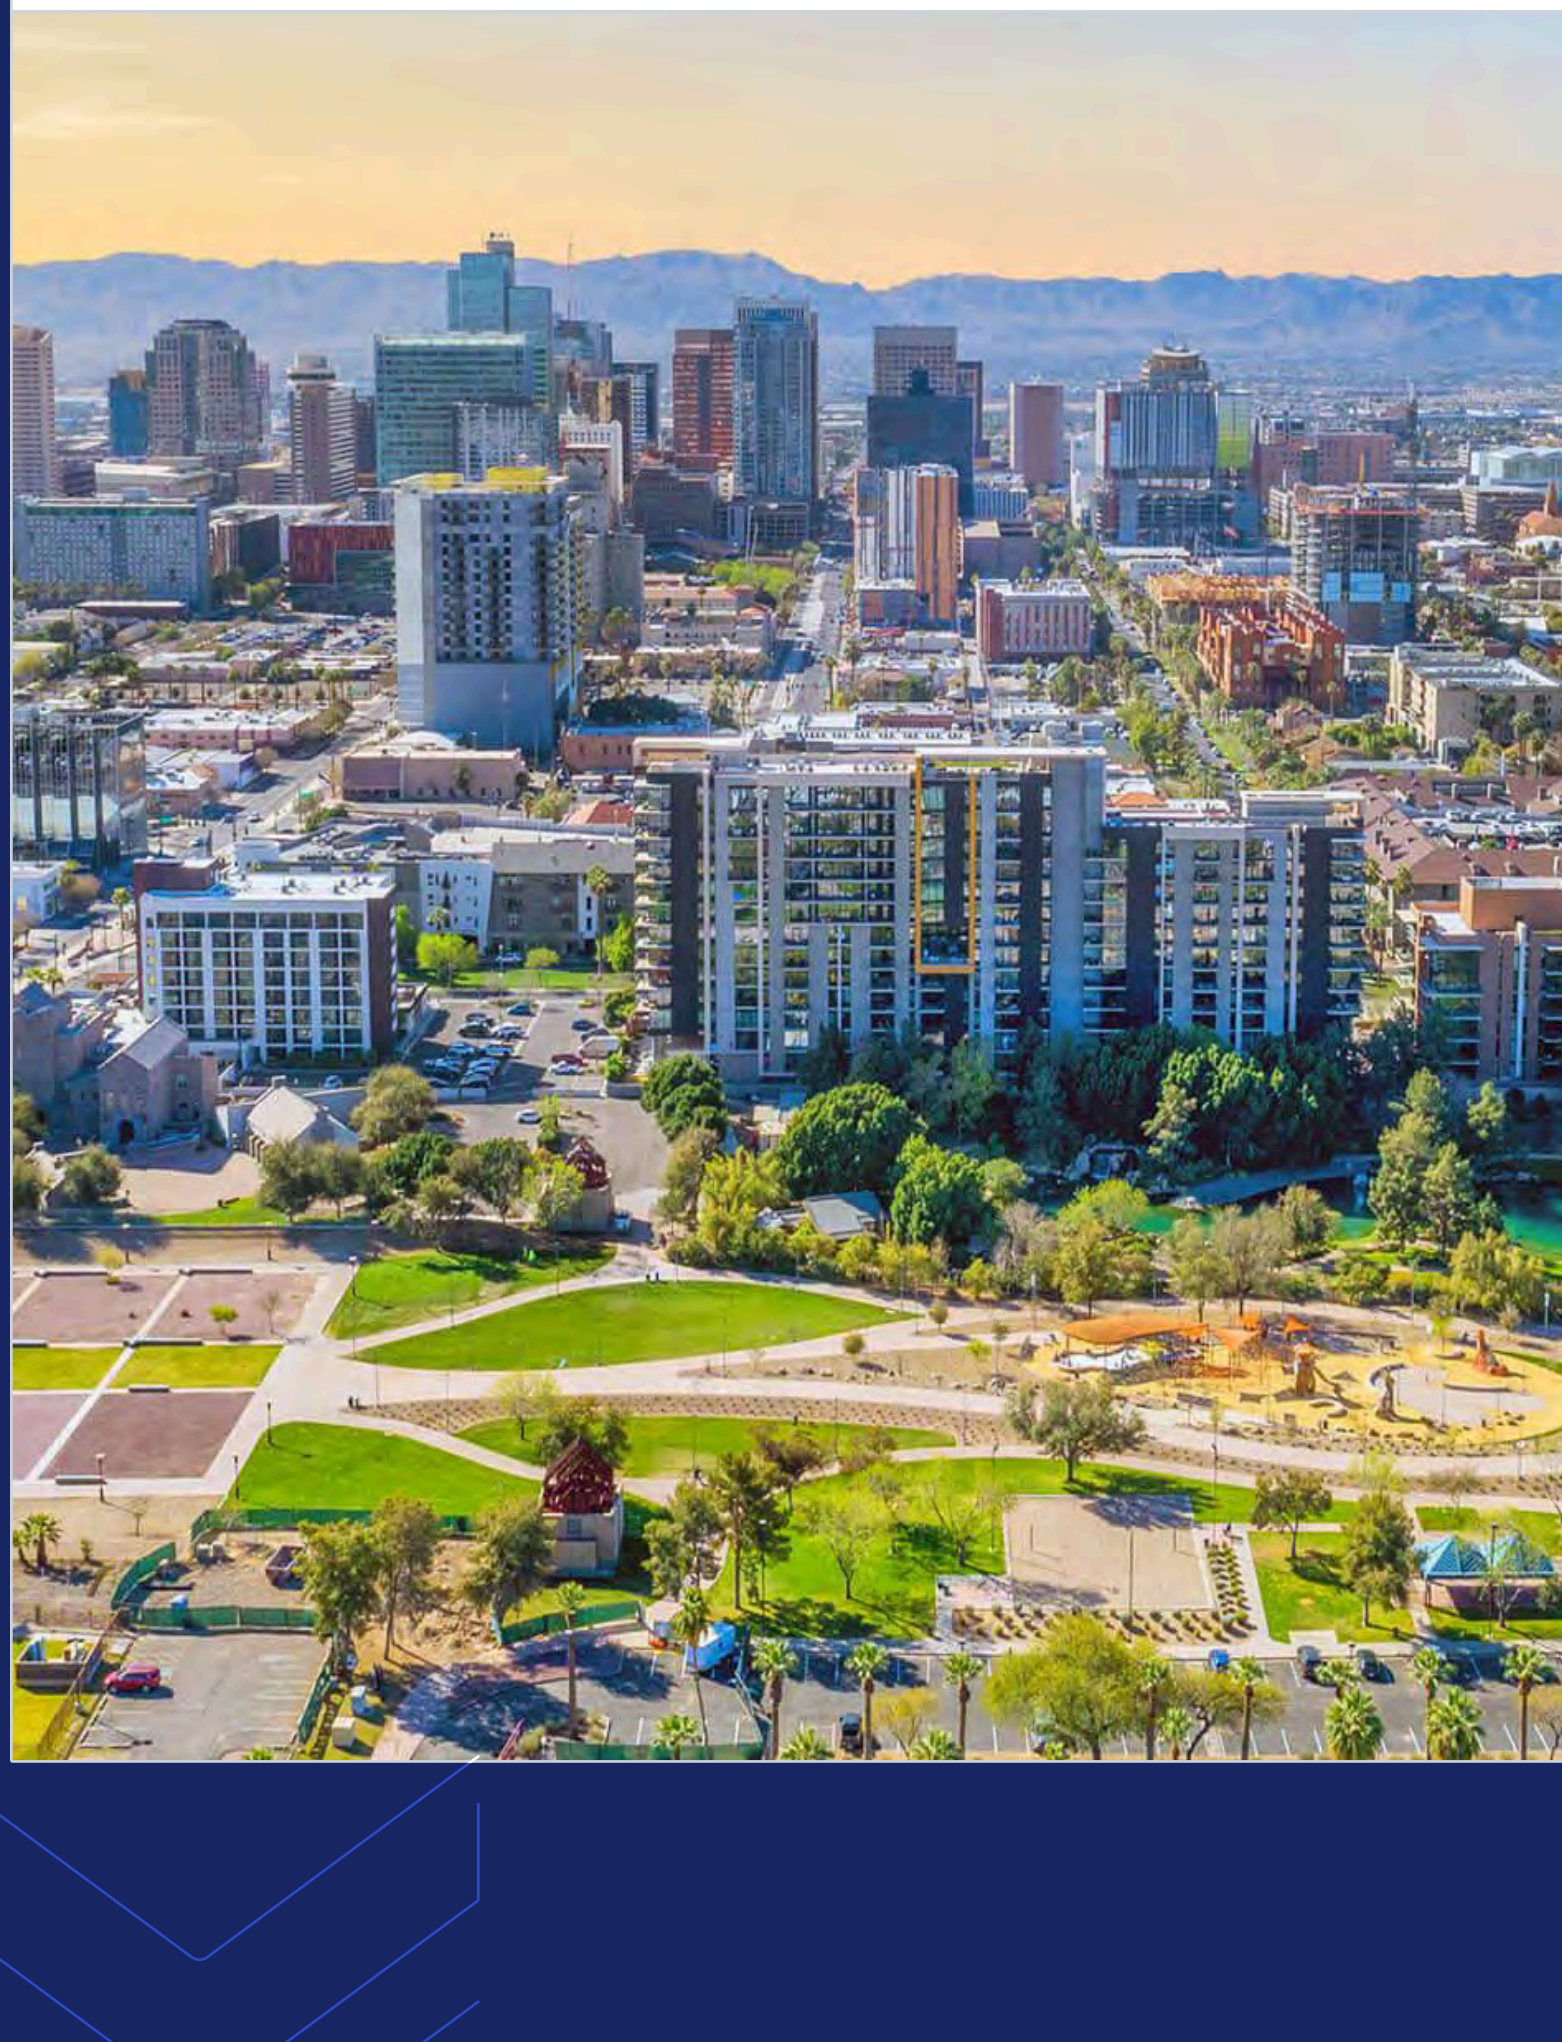

Turn comprehensive resource data into measurable operational improvement

- Find and rectify inefficiencies through comprehensive audits.
- Navigate de-regulated energy contracts and regulated rates.
- Optimize waste procurement and contract management.
- Modernize your telecom operations and maximize your buying power.

"We feel confident knowing that ENGIE Impact's team of sourcing experts will bring opportunities to us and that the recommendations they are making are helping us to reduce costs and minimize risk."

Jeff Patton, Brookdale Senior Living

ENGIE Impact in Action

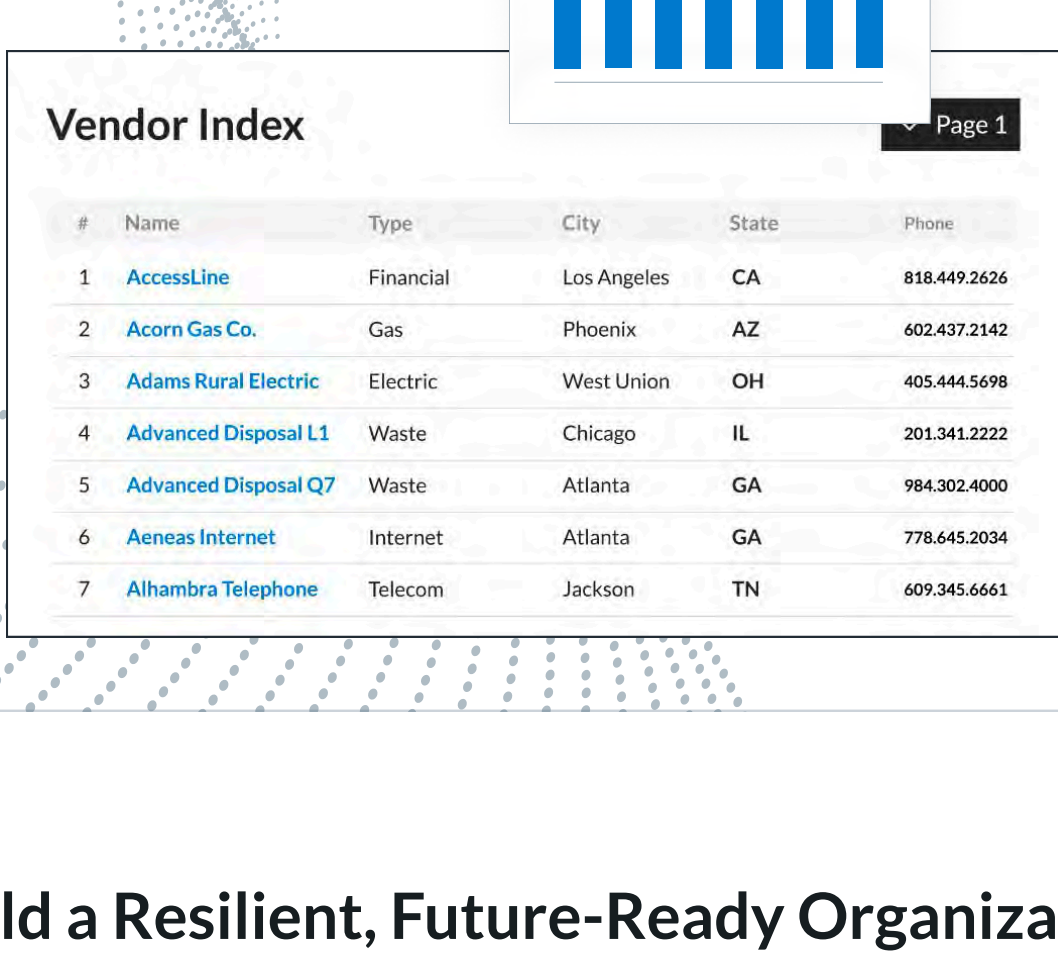

National Bank of Arizona Partnered with ENGIE Impact To Increase Visibility into Energy Usage Across 70+ Branches

Using our Utility Expense & Data Management solution, we implemented a user-friendly reporting interface that provided year-over-year consumption data down to the meter level. Through our partnership, National Bank of Arizona gained extremely useful insights:

- ✓ Identified a faulty electric meter that had caused a 187% increase in electricity expense.
- ✓ Detected a gas leak on a rooftop HVAC unit through unusual natural gas consumption patterns.
- ✓ Discovered a broken landscape line through water usage alerts.

Verity Corporation Streamlines GHG Emissions Recalculation Following Major Acquisition

When **Verity** added energy-intensive manufacturing sites to their portfolio, the acquisition then accounted for approximately 46% of their total inventory. The company implemented a comprehensive solution using ENGIE Impact's Ellipse platform and expert GHG accounting services. The solution revealed a 42% emissions reduction from 2020 to 2024, and the acquired OPS operations showed a 26% reduction over the same period—proving that the acquisition aligned with Verity's emission reduction goals.
