

Creating a More Sustainable Tomorrow

Designing a Better Future Today

Who We Are

The Green Engineer, Inc. partners with clients to design high-performance, low-energy, healthy buildings that are sustainable, resilient and tailored to each project's unique goals.

We offer a comprehensive suite of services to reduce operational and embodied carbon, optimize daylight, and ensure compliance with evolving regulations. Our work helps create spaces that are not only efficient and durable but also comfortable, environmentally responsible, and in support of occupant health and well-being.

Sustainability - both environmental and social - is our focus. Our commitment to quality and performance has earned us recognition as a **LEED Proven Provider** by the U.S. Green Building Council—a distinction that streamlines certification reviews and instills greater confidence in project outcomes.

As a **Massachusetts Benefit Corporation**, a **Certified B Corp**, and an **employee-owned firm**, we integrate social and environmental impact into every aspect of our work.

Our Team

The Green Engineer, Inc. is comprised of Sustainability Consultants and Building Performance Analysts with diverse backgrounds in engineering, architecture, construction, planning, and environmental science. Our team includes 4 WELL Faculty and multiple WELL APs, several of which serve on IWBI advisory committees. This allows us to approach every project with a well-rounded and informed perspective.

Our Approach

We work closely with design teams to provide technical expertise and cross-disciplinary insight. Our firm has multiple staff members who are on professional committees, working to develop future versions of LEED, WELL and ASHRAE. This provides us with the ability to offer strategic guidance to enable teams to stay ahead and make informed decisions. Our objective is to help clients save time, reduce risk, and maximize impact.

Our Achievements

The Green Engineer has been helping clients achieve their health and wellness goals around WELL since its launch. EMD Serono – a healthcare R&D wing of Merck kgAA, was the first WELL Gold New Construction project in North America. To date, The Green Engineer has helped certify, or are in the process of certifying 6.8 million square feet, consisting of 14 WELL certifications, WELL Health-Safety ratings, WELL Multifamily Residential Pilot, both for individual projects and for portfolio holders.

Sustainability and social responsibility are at the core of who we are. As a JUST-labeled organization, we are committed to Justice, Equity, Diversity, and Inclusion (JEDI). We strive to meaningfully integrate equity, accountability, and sustainability into our work—ensuring benefits to both people and the planet.

Mission Statement

Together with our clients, we strive to build a sustainable future that supports the health and well-being of individuals, communities, and the planet as a whole.

Get in touch and let's see what we can do together
