Yes, it's true that "Endless Summer" hydrangeas are known for their reblooming capabilities, meaning **they can still be blooming well into the fall!**

Late Summer Watering Tips

It's been a hot summer, the sun keeps shining, the temps keep climbing and your garden and lawn need a little extra love to keep thriving through the season! 💧

3 Smart watering tips to help your outdoor spaces stay healthy and hydrated for the rest of the summer season!

Water early (or late!)

Beat the heat by watering in the morning before 10 a.m. or in the evening after 6 p.m. It helps reduce evaporation and gives moisture time to sink in deep.

Water the roots, not the leaves.

Focus your watering at the base of your plants. It's more efficient and helps prevent mildew, especially during humid spells.

Raise the blade on your mower.

Let your grass grow a little taller - around 3 inches to naturally shade the soil, protect the roots, and hold onto moisture longer.
