

Applied Power Products

Excellence in Every Part.
Trust in Every Partnership.

**Manufacturing,
Fabrication &
Distribution**

Specialty Seals and O-Rings

Precision sealing solutions for demanding applications.

Applied Power Products provides **O-Rings, molded rubber seals, wipers, rotary seals, spacers, and bonded seal solutions** for standard, high-performance, and custom applications. We support customers across industrial, agricultural, automotive, and regulated sectors, offering both standard and specialty material formulations.

We also support **product identification needs**, including branded molded components, color coding, marking, and custom packaging.

O-Rings

Applied Power Products supplies high-quality O-Rings designed for reliable sealing performance across a wide range of industrial and OEM applications. Available in standard and custom materials, our O-Rings deliver consistent results in both low- and high-pressure environments, ensuring dependable protection against leaks and contamination.

Types Available

Many available in standard AS568, JIS, BS1806 and Metric sizes. Molded or spliced O-Rings also available.

Material Types and Durometers

EPDM, Neoprene, Buna-N, Silicone, FKM, FFKM, PTFE, Nylon, PVC, X-Rings and more.

Specialty Seals

Our Specialty Seals division provides precision-engineered sealing solutions built to perform under demanding conditions. From rotary and piston seals to bonded and spring-loaded options, each product is designed for durability, efficiency, and exact fit. We offer both standard and custom seal profiles to meet your unique application requirements.

Types Available

Wipers, Glyd rings, Graphite packing rings, Piston rings and seals, Backup rings, Bonded seals, Metal seals, Rotary seals, Rod seals, Spacers, Spring loaded seals, Spiral wound, Molded, Industrial, military and custom formulations.

Domestic and offshore manufacturing both available for O-Rings and Specialty Seals.

Material Fabrication

Custom Fabrication. Consistent Quality. Complete Solutions.

Applied Power Products delivers precision-crafted components and flexible manufacturing for every industry. From die-cut and waterjet-cut fabrication to molded parts, we provide the expertise, equipment, and materials needed to make your projects move smoothly from concept to completion.

Die Cut & Waterjet Fabrication

We produce clean, consistent, and accurate components from a wide range of materials. Whether you need prototypes, short runs, or high-volume production, we deliver quality parts **exactly to spec, on time.**

Capabilities

- Die-cutting
- Waterjet Cutting
- Router Cutting
- Laminating
- Slitting
- Rapid Prototyping
- Specialty Packaging
- In-house Die Making
- Assembly

Materials

Rubber, foam (Open / closed cell and sound dampening), cloth inserted sheet, conveyor belt, UHMW, ABS, HDPE, Nylon, PTFE, urethane, cork, felt, matting, conductive elastomers, pressure sensitive adhesives, VHB, viton, silicone, non-asbestos gasketing, Poron, Safety Walk, foil, and more.

Molded & Extruded Products

We deliver high-precision custom and standard parts - whether seals, profiles, or molded shapes. We can serve as your stocking warehouse to reduce overseas lead times and streamline your supply chain while giving you design support **from concept to delivery.**

Capabilities

- Custom Molded Parts
- Custom Extrusions
- Standard Parts & Extrusions
- Over Molding
- Dual Durometer Parts and Extrusions
- Tubing
- Molded Hose
- Part and Tool Design Support
- Offshore Sourcing

Materials

Rubber, plastic, urethane, silicone, mil-spec, vibration composites and more.

Hose and Fittings

Field-ready hose solutions built for safety and reliability.

We supply **bulk hose, finished hose assemblies, and related fittings** for a wide variety of pneumatic, hydraulic, industrial, and material transfer applications. Assemblies are built in-house for accuracy, safety, and tested performance. We stock multiple materials, diameters, and pressure ratings to meet demanding operational requirements.

Bulk Hose and Assemblies

Applied Power Products offers a wide range of bulk, cut or assembled hose products for all types of industry needs. Whether you need a single hose to get up and running or repeat shipments, we can assist you.

Types Available

- Pneumatic
- Hydraulic
- Water
- Suction and Discharge
- Chemical
- Food and Beverage
- Petroleum
- Lay-Flat
- PVC
- Nylon
- Vacuum
- Wire and Fabric Reinforced
- Braided
- Tubing
- And More!

Fittings and Accessories

We stock and source a wide range of hose fittings and accessories from both domestic and international manufacturers. Our selection ensures the right fit and performance for nearly any application, with reliable options available in brass, steel, plastic, and specialty materials.

Types Available

- Brass
- Steel
- Plastic (Nylon and PVC)
- Elbows
- Tees
- Reducers
- Unions

Accessories

- Pins
- Retaining Rings
- Clamps
- Hose Separators
- Caps
- Hose Guards
- Valves
- Plugs
- And More

Material Handling

Durable, reliable conveying solutions.

We deliver comprehensive material-handling solutions that keep your operations running efficiently and reliably. Our extensive offering of conveyor belts and components is designed to maximize uptime and minimize downtime. Backed by knowledgeable engineering and selection support, our team helps you identify the right products for your specific application.

Conveyor Belts

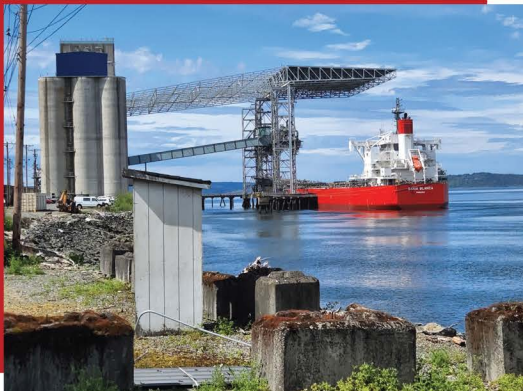

We're Continental's largest and oldest distributor of grain conveyor belts with 75 years of service.

- Grain
- Mining
- Sand & Gravel
- Package Handling
- Engineering Design and Selection Support

Conveyor Components

- Pulleys / Idlers
- Buckets / Hardware
- Motors / Drives
- Belt Lacing
- UHMW / Urethane Sheet
- Replacement Paddles

Conveyor Equipment

- Bucket Elevators
- Open / Enclosed Belt Conveyors
- Drag Conveyors
- Screw Conveyors

Power Transmission Products

Reliable components that keep systems running smoothly.

Our Power Transmission Products division offers a complete line of **bearings, chain, sprockets, gears, sheaves, motors, and couplings** to support power transmission needs across industrial and agricultural markets. We work with both domestic and global manufacturers to ensure quality, competitive options, and dependable lead times.

Bearings and Power Transmission

We are a top distributor of quality bearings, drives and components.

- Bearings (domestic and offshore)
- Chain
- Gears
- Sheaves and pulleys
- Drive belts
- Sprockets
- Couplings
- Motors
- Idlers
- Available in multiple materials
