

MAJU TANAH LIAT SDN. BHD.

**BALL CLAY AND SAND
EXPERT**

ABOUT US!

MAJU TANAH LIAT SDN BHD is known as the famous mining industry in Malaysia which has been operating for more than 7 years. We are a contractor under Menteri Besar Incorporated Perak. Our company supplies Ball Clay and also silica sand. We are also a direct supplier and owner of concessions, so buying from us means you will have a great cost-saving for your material sourcing.

LOCATED IN MALAYSIA, Maju Tanah Liat Sdn Bhd has been supplying clay and sand for construction, manufacturing, ceramic, tiles, porcelain, paint and cosmetic industries worldwide. Our main exports were to middle East countries as well as Asian Regions.

Principle of our work

QUALITY

We aim to supply the highest quality ball clay and sand for our local market and as well as the international market.

GROWTH

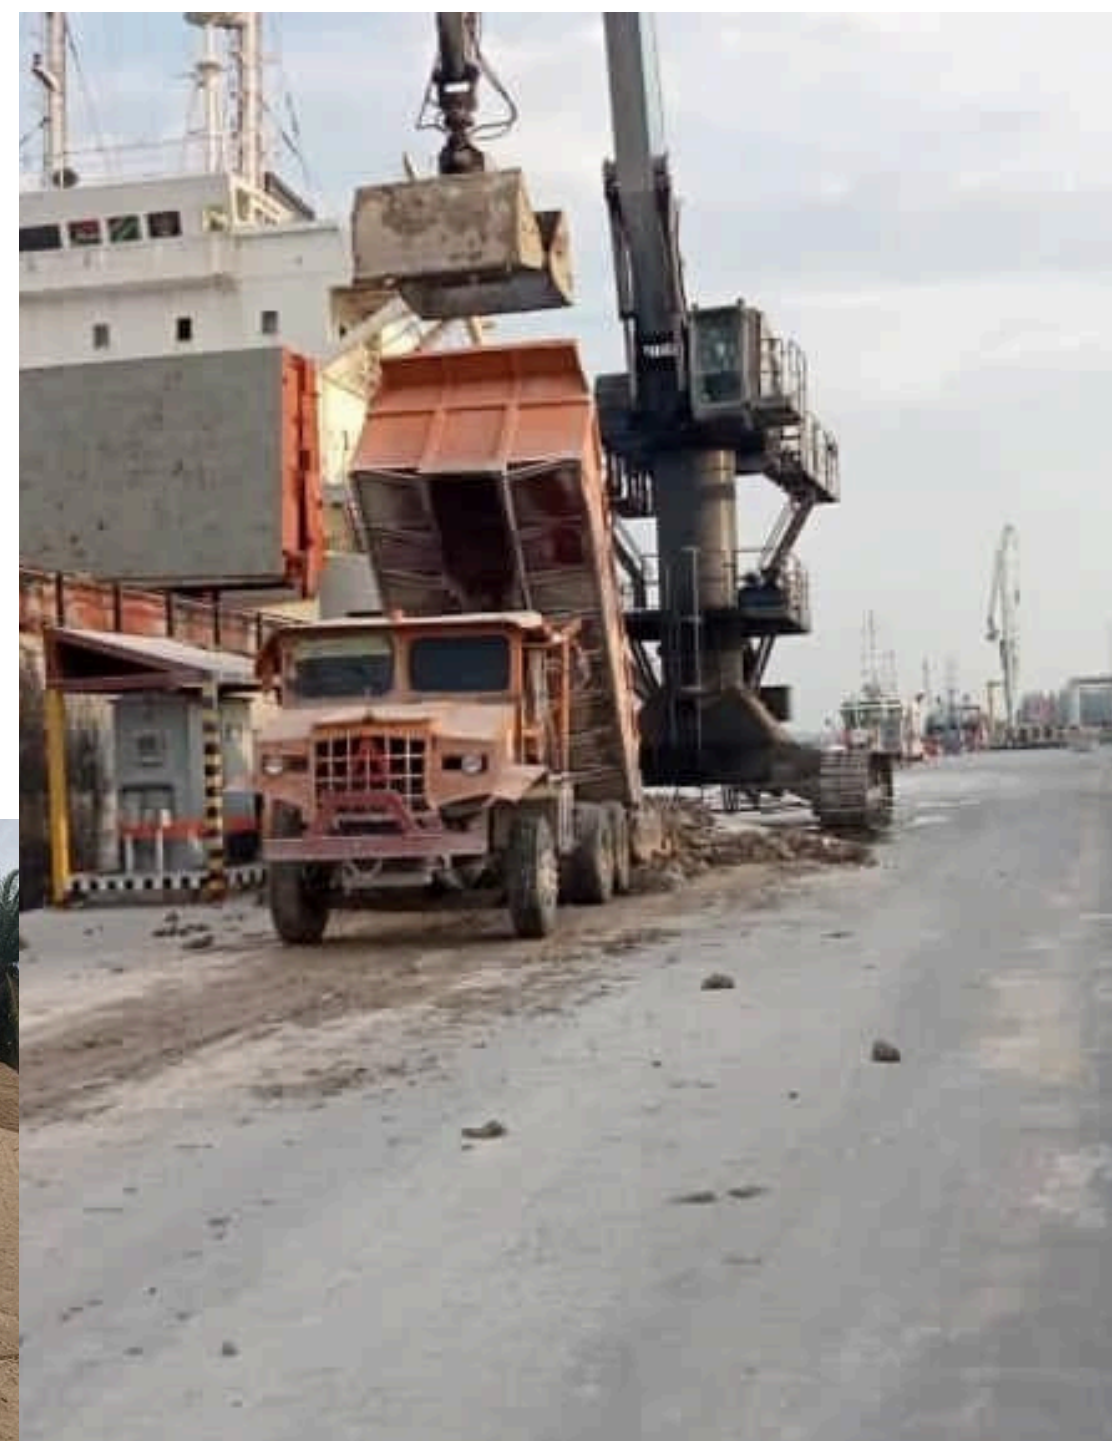

To maintain a good relationship with the partner and customer in order to enhanced customer satisfaction.

SATISFACTION

Ability to improve customer productivity by providing the optimum resource for the customers' needs.

PRODUCTIVITY

We always enhance our quality and technology to ensure our end product/material is in the highest state.

WHAT WE PROVIDE

ABOUT BULK SHIPMENT CARGO

Bulk shipping is the transportation of goods in large quantity, usually not packed but loaded directly into a vessel. Such goods are ball clay and sand. These type of goods are referred to as bulk cargo.

ABOUT JUMBO BAG CONTAINER

A flexible intermediate bulk container, jumbo, bulk bag, super sack, or big bag, is an industrial container made of flexible fabric that is designed for storing and transporting dry clay, sand, and ball clay.

ABOUT MINING MACHINERY

Big in terms of vast quantities of materials handled 24 hours a day, by large machines with exceptional loading capacity; and big concerning considerable savings in your running costs.

ABOUT SAND

Our sands are perfect for any construction and were inspected by the Bureau Veritas (International).

ABOUT BALL CLAY

Ball clays or plastic clays are fine-grained, highly plastic sedimentary clays, which fire to a light or near-white colour. They are used mainly in the manufacture of ceramic whiteware.
