CDPH Project Firstline — EVS Training Toolkit

How to Use the Toolkit

The toolkit consists of 4 stand-alone training modules (15–20 minutes each) designed to be delivered in order and then reused for follow-up training. Each module includes instructor prompt questions, hands-on activity checklists, and a corresponding flipchart. Download the Implementation Guide to plan your curriculum and training schedule. Modules build on each other but can be used independently. All materials are in the public domain, so no permission is needed. Acknowledgement is appreciated.
