

Agentify Your SOC with BlinkOps

Blink is an open security operations platform. Blink's micro-agents ingest alerts from any source, then enrich, investigate, mitigate, and remediate them autonomously, with human-in-the-loop approvals when needed.

One platform. Unlimited possibilities.

30K+

Integrations

1M+

Alerts Processed Daily

15M+

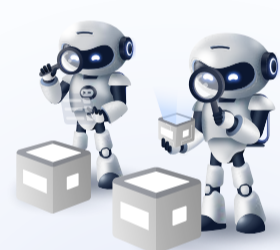

Actions Run Daily

500+

Unique Micro-Agents

Hundreds of Specialized Micro Agents

Every alert is investigated end to end, from noise reduction and enrichment to full triage context, producing clear intent, risk assessment, and recommended actions. Micro-agents can also trigger mitigation and remediation actions with human-in-the-loop approvals.

Threat Hunting Agent

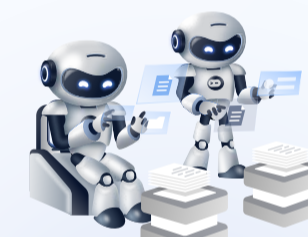

DLP Agent

Phishing Agent

Malware Agent

Response Agent

One Platform

Blink lets you build customized workflows, dashboards, and micro-agents on a single platform. Create tailored solutions for Threat Hunting, Threat Intelligence, Detection Engineering, Forensics, or anything your team needs.

AI as a Service

BlinkOps AaaS helps you accelerate your SOC AI transformation. Our top-tier forward deployed engineers assess, design, and build agentic solutions customized to your needs.
