

Agentic Security Operations Platform

BlinkOps empowers you to agenticify your security operations by amplifying the capacity of every security operator through custom micro-agents deployed across your entire technology stack.

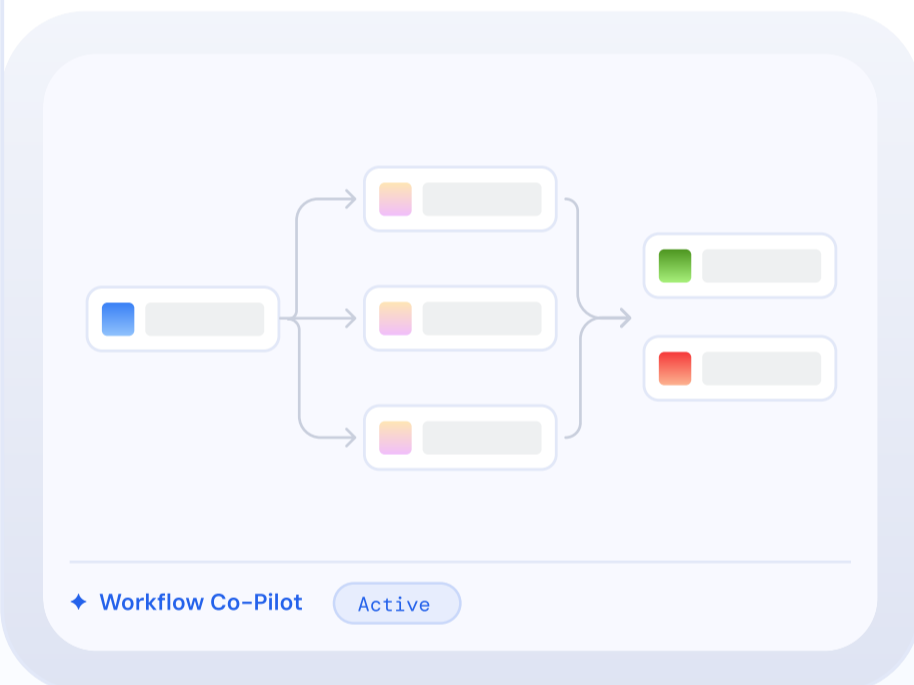

With thousands of integrations and full human-in-the-loop control, BlinkOps goes beyond simple automation to deliver complete, enterprise-ready solutions.

From idea to reality in a Blink of AI

One Platform to Agenticify Everything

- ✦ **Create tailored security solutions for any domain or use case**, from SOC operations and incident response to identity, vulnerability management, GRC, cloud security and beyond.
- ✦ **Create custom workflows and AI-powered micro-agents** that match the way your team operates, combining deterministic automation with agentic reasoning.
- ✦ **Scale with confidence through enterprise-grade governance**, including fully auditable actions, transparent AI reasoning, and enterprise-grade guardrails built into every step

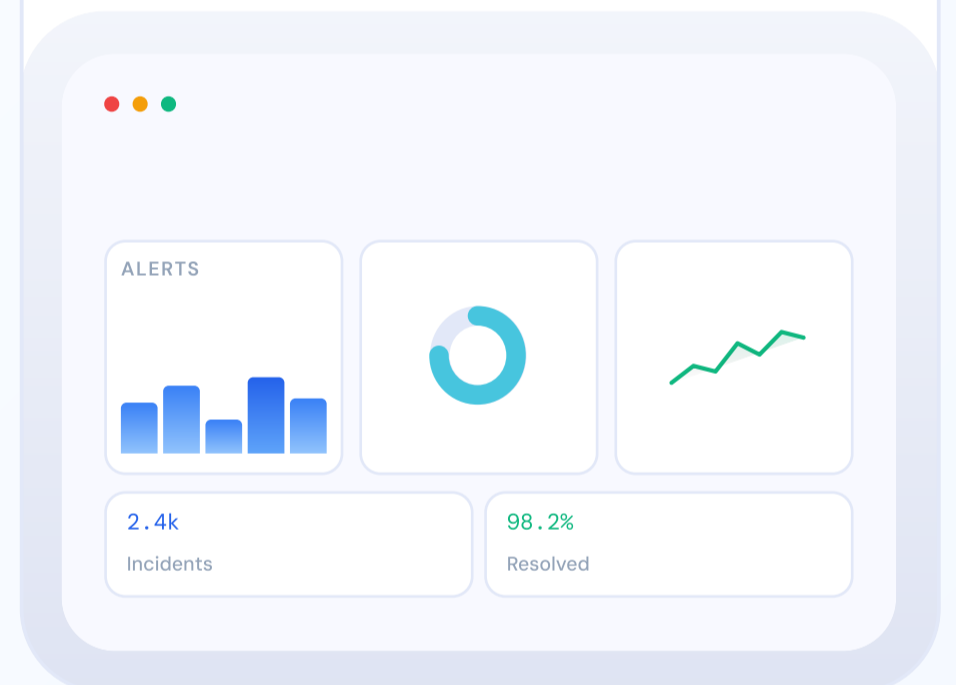

Workflow Studio 30,000+ Integrations

Agent Studio Custom Micro-Agents

Solutions Studio Custom Apps & Dashboards

10K+ Pre-built Workflows

500+ Pre-built Micro-Agents

50+ Pre-built Solutions

AI as a Service

Accelerate your AI Transformation

-  **Analyze** your current security program and operating model
-  **Discover** opportunities to agenticify your security operations
-  **Implement** agentic solutions tailored to your environment
