

Patrik Wilska

Application for Former of the Board

Greetings KY,

I'm Patrik, a third-year student of international business, association work enthusiast, amateur chef, and a candidate for Former of the Board of KY 2027. I fell in love with the KY community early as a mursu which motivated me to do everything in my power to have a positive impact in our members' lives. My journey here has taken me to many places, including chairing an association in the face of great change and serving for a year on Suomen Ekonomit's Student Associations' Chairpersons' Network. My proudest achievement has been securing spaces from Aalto University School of Business for KY associations, with a possibility for more in the future. It only feels natural to step up to the challenge of chairing KY next, and here are some of the things I would work towards:

Building on KY's growing presence in Aalto

External relations and perceptions have been important to KY for the past few years. Great thanks have been received simply by making KY more visible and accessible to the Aalto community and external stakeholders. KY should continue to strengthen its presence at Aalto and elsewhere, promoting cooperation and collaboration.

KY building as a cornerstone of our future

With the KY building opening just around the corner we must prepare to cement it as an inseparable part of our culture. The KY building must be accessible to all members, with a low threshold to walk in and find a place where they belong. Through accessible activities and cooperation with our associations, we can make the building a home for every kylteri, not just its most active volunteers.

One KY - empowering our members and associations

KY exists for its members and through the dedication of its members. Our diverse and unique community is our greatest strength and must be treasured and supported in practical and sustainable ways. I would strengthen the dialogue between KY and its associations, ensuring their needs are genuinely heard and that KY's support develops alongside them.

As a leader I create a positive and encouraging atmosphere in the teams I lead. I believe that the best leaders are people who don't look for the spotlight, but instead enable those around them to succeed and be the best version of themselves. I know that I can offer KY a former of the board who can combine my experience with the complementary strengths of the board for a better shared future.

With all my heart,

Patrik Wilska
