

WOMEN IN LEADERSHIP LEADING WITH VISION AND INSPIRING OTHERS

Women can lead with empathy by creating a work culture based on understanding and emotional intelligence.

Establishing support networks and encouraging collective effort to overcome challenges is one way for female leaders to inspire others.

Inspire others by valuing each voice and nurturing an environment where learning from each other is emphasised.

Leading with visionary thinking and strategic initiatives encourages big-picture thinking and adaptability in strategic planning.

It is essential to support women's leadership and commit to actions that advocate for and celebrate women leaders, fostering inclusivity and innovation.
