

Key Programming Software Update Nissan* ADS2326 - Code D756299AD

September 2025

UNIQUE SOLUTION NOW EXTENDED TO 2025 MODELS

Advanced Diagnostics is pleased to announce an update for the Nissan ADS2326 software to extend key programming to popular, recent Nissan models, including the Qashqai, Juke and X-Trail.

What does the software do?

The software programmes proximity keys for a selection of recent Nissan models, some even in an all keys lost situation. All keys will be erased before programming new ones. The software bypasses the security pincode and programs the remote and the transponder at the same time.

To complete the procedure the new ADC2017 cable is needed. Unlike other solutions, the ADC2017 cable plugs directly into the BCM (Body Control Module) without need of further intervention on the vehicle.

What else is needed?

Smart Pro

Cable ADC2017
(Code D755649AD)

Silca proximity keys NSN14AP44 -2 button, NSN14BP44 -3 button
(depending on the specific model)

OFFER DETAILS

Cable	ADC2000 - ADC2013
Software category	A
Smart Aerial required	No
Other accessories required	ADC2017
