

Key Programming Software Update

Ford* | ADS2269 - Code D753712AD | March 2026

FIRST TO MARKET all-keys-lost key programming for Ford models with an active alarm and a Continental Body Control Module

What does the software do?

Advanced Diagnostics is pleased to announce an update of the ADS2269 key programming software compatible with Ford* to include many new applications, including FIRST TO MARKET all-keys-lost programming for models with an active alarm and a Continental Body Control Module using the ADC2020 key emulator together with the ADC2025 bypass cable.

The procedure requires 2 tokens: one for server access/authentication and one for key programming. With a UTP plan, both key programming and server access are included in the UTP subscription. This software does not alter the vehicle firmware, making it a safer solution compared to others available on the market.

What else is needed?

Smart Pro

ADC2020

ADC2025

Silca remotes HU101AP05

Silca remotes HU101R15

Silca remotes HU198P14

Cable and key use depends on specific model

OFFER DETAILS

Cable	ADC2000
Smart Aerial+ required	No
Software category	A+
Other accessories required	ADC2020, ADC2025 (certain applications only)
