

**Bypass Cable ADC2025 compatible with Ford  
Code D757871AD | March 2026**

**FIRST TO MARKET, all-keys-lost key programming for Ford models  
with an active alarm and a Continental Body Control Module**

**What does the Bypass Cable do?**

The ADC2025 bypass cable connects the Smart Pro directly to the vehicle's Body Control Module and will read the necessary data to emulate a working key without interference from the active alarm. The ADC2025 works in conjunction with the ADC2020 to emulate a working key.

- extends all keys lost key programming to a wide range of popular Ford models
- reduces programming time for alarm-active vehicles to around 5 minutes
- eliminates the need to disconnect the vehicle battery
- no need to cover ultrasonic sensors to silence alarm

**What else is needed?**

Smart Pro
