

vitAlign®

cellular vitality and protection

Target Aging and Cellular Stress with Precision

Aging is inevitable, but how we age is shaped by the health and resilience of our cells. Every day, our bodies are impacted by the gradual buildup of cellular stress from aging and modern-day stressors—both of which influence how we feel, move, and recover.

VitAlign® is a broad-spectrum, plant-based polyphenol complex clinically shown to support healthy aging and combat stress by targeting the root causes of cellular dysfunction: *oxidative stress and mitochondrial inefficiency*.

Cellular health

- Supports cellular resilience
- Enhances energy utilization

Immune health

- Provides system-wide defense
- Supports a balanced response

Heart health

- Promotes healthy circulation
- Supports cardiovascular vitality

VitAlign delivers clinically proven cellular performance and protection—helping restore balance where it matters most.

FUTURE  CEUTICALS

Clinically Proven Cellular Performance

VitAlign® is backed by three peer-reviewed human studies—acute, 90-day, and post-viral recovery—demonstrating measurable improvements in key biomarkers that impact cellular performance and resilience.

- **Improved Redox Balance** – 75% reduction in mitochondrial reactive oxygen species (ROS) over 90 days
- **Enhanced Mitochondrial Function** – 65% improvement in mitochondrial efficiency within hours
- **Increased Nitric Oxide Production** – 53% boost in circulating nitric oxide levels

Comprehensive Cellular Health Solution

VitAlign delivers broad-spectrum antioxidant activity from seven nutrient-dense superfoods: green tea, green coffee, turmeric, blueberry, cherry, broccoli, and kale.

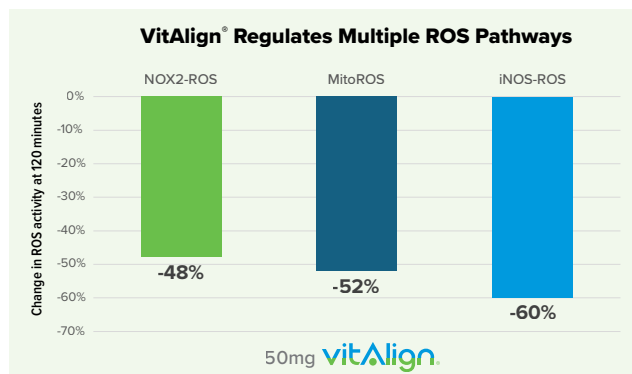

- Standardized to 60% polyphenols, 30% catechins, and 3% curcuminoids
- Outperforms single dimension antioxidants like Vitamin C at 1/20th the dose

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Cellular Stress Protection

Cellular protection starts with how well your cells manage reactive oxygen species. When ROS accumulates, they can damage cells and accelerate aging. VitAlign helps regulate three key ROS-producing pathways critical to cellular, immune, and cardiovascular health.

- **Mitochondrial ROS** – Elevated ROS levels can impair cellular efficiency and energy metabolism
- **iNOS** – Overproduction can degrade nitric oxide, impacting circulation and endothelial function
- **NOX2** – Excessive ROS can weaken immune defenses, leaving the body more vulnerable to viral threats

A single 50mg dose of VitAlign provides significant reduction in markers of cellular dysfunction and oxidative stress

Plant-based formula, clinically effective at a 50mg dose

Rapid and long-term oxidative stress resilience

Increases endogenous nitric oxide levels

Enhances cellular and mitochondrial efficiency

Elevate your next formulation with VitAlign®—clinically backed, multi-pathway support for optimized cellular performance and protection.
