## At Colt Stables we are dedicated to producing quality equestrian buildings to a high specification at unbeatable prices.

Colt Stables and Mobile Field Shelters are everything you need, and nothing you don't. We don't dress our equestrian buildings up, they're naturally tough and functional.

Our equestrian range of timber buildings are designed by horse owners and built to last using pressure-treated timber that's sustainably sourced, with an emphasis on low environmental impact and good value for money.

All our buildings can be purchased as a kit, keeping prices low or you can opt for low-cost installation by our own expert team. Even better, all our prices include VAT so there are no hidden extras.

- 7-14 DAY DELIVERY
- FREE SHIPPING TO HOME COUNTIES
- 5 STAR REVIEWS
- NATIONWIDE INSTALLATION

# FIXED STABLES

Colt Stables offer exceptional value for money without compromising on quality. Our equestrian buildings include many features which can normally only be found on more expensive buildings.

You can also personalise your spec with optional extras, a full list of available upgrades can be found on our price list.

Images show optional extras, which have been included within the overall price

# MOBILE STABLES

Colt's Mobile Stables are fast, flexible and affordable portable stabling solutions for horse and stable yard owners. They are perfect for people who don't own the land their horses are stabled on and any horse owner who varies their grazing. Mobile Stable can be moved from paddock or field at a moment's notice.

As our Mobile Stables require no groundworks to be built and used, they are deemed non-permanent structures and are therefore often exempt from planning permission (please confirm with your local authority as this can vary). This saves you a lot of time, hassle and expense dealing with contractors and local authorities.

# DIY KIT

## As standard all our buildings are a DIY kit

- Equestrian building designed to your chosen size and options
- Supplied as a ‘flat-pack’ kit
- All fixings included
- We will provide base plans
- Detailed instructions (videos available for some buildings)
- The lowest cost way to get your new stables or shelter
- Free delivery available to certain postcode zones (see website for details)

# DELIVERED & INSTALLED

- Equestrian building designed to your chosen size and options
- Base plans supplied
- We will deliver to you
- Our expert team will install on site for you
- In most cases your building will be delivered, installed and ready to use on the same day
- Installation is low-cost and calculated on your location

All deliveries require access for one of our lorries and hard standing to offload. Our team will discuss your specific location with you - for paddock or field locations you will likely need your own tractor and trailer, telehandler or forklift. Please keep in mind your horse is likely to be a lot better over rough terrain than our vehicles.

# MOBILE EQUESTRIAN BUILDINGS & PLANNING PERMISSION

Planning permission is not normally required for our mobile buildings. However, we would suggest that you are able to demonstrate that you can move your building in the event you are asked to by the local council planning officer.

Should you require planning permission for any of our buildings we can supply you with elevated drawings to submit to your local council. There is a small charge for this service.

## YOU MAY NOT NEED PLANNING

**Planning permission may not be required for mobile buildings. Check with your local authority.**

# STABLE AND SHELTER SPECIFICATIONS PAGE

## Barge Boards

All in pressure-treated, prepared timber, fixed with galvanished nails.

## Canopy/Overhang

Front overhangs extend to 1200mm (4').

## Doors

Stable doors are 2070mm high, 1220mm wide, 50mm thick. Bottom doors are lined with heavy duty OS Board. Top doors are ledged and braced. An anti-chew strip is fitted to the top of the lower door. All door fittings are heavy duty and galvanized, to include 450mm (18") heavy teehinges, 203mm (8") pad bolt, heavy duty kick bolts and cabin hooks.Tack Room doors are ledged and braced and fitted with a 200mm (8") pad bolt.

## Field Shelter Openings

As standard our Field Shelter openings are 2.4m (8') wide. Field Shelters measuring 3.6m (12') and 5.4m (18') have a single opening and 7.2m (24') and 10.9m (36') have two openings as standard. Other options are available on request.

## Guttering

Half round, black guttering and downpipe is fitted to the front of all units. Rear guttering is available on request.

## Height

To eaves, measures 2235mm (7'4") and aprox 3.0m to ridge (10'), including roof covering and brickwork. With a roof pitch of 15°.

## Kickboards

Loose Boxes are lined to 1200mm (4') with 11mm OS Board.

## Gates

Metal or timber gates can be fitted to our Field Shelters as optional extra's.

## Timber Skids

Timber skids measure 150mm x 75mm (6" x 3") are pressure treated.

## Metal Skids

Metal skids measure 80mm x 80mm (3 1/8" x 3 1/8") and are galvanized. A metal chain for towing is supplied as standard.

## Roof Construction

Purlins are 100mm x 50mm (4" x 2") spaced at 600mm (2') centres, held in place by joist holders on prefabricated trusses, and then covered with black Onduline roof sheeting. Optional roof finishes include coloured Onduline or boarding to the underside with OSB.

## Timber Treatment

All exterior timber is pressure-treated to ensure a long maintenance free life and requires no further treatment.

## Wall Cladding

High-quality pressure-treated 16mm shiplap cladding on the outer walls. (finished size 12mm).

## Wall Construction

Walls are built with 75mm x 50mm (3" x 2") CLS timber framing, spaced at 600mm (2') centres.

## Windows

We can add an opening window fitted with perspex measuring 460mm x 660mm (18" x 26") to each loose box for a small additional cost.

All timber sizes listed are approximate and may differ after planing and manufacture.
