

Learn why people love cinten

Below are testimonials from our clients and partners.
Read through them and learn how cinten is revolutionizing the decision making world

cinten

"The cinten software is a game changer when it comes to training for safety and security preparedness for any organization. It creates a realistic training environment that tests everyone's skills and abilities."

Joseph Pangaro,
President and CEO at True Security Design

"We held an organizational war-game using cinten and were really satisfied with the end product. The cinten team was on our side from the dilemma definition and up to designing the real life scenarios we used during the war-gaming session.

The results were outstanding, delivering clear graphic insights as to how our organization reacted to the crisis including a thorough analysis into the decision making process."

Pascal Buchner
ITS Director & CIO,
The International Air Transport Association

"We all know the problem with tabletop and business continuity training. Apathy and the feeling that it just gets in the way of revenue-making tasks. Well, we all experienced something that might change that mindset when we tested the cinten for Virtual Tabletop Training...The data sets are pretty telling, from word clouds to the algorithm assessing the individual stress and capacity of each player throughout the exercise. For any C-suite or CMT, this data can provide quantifiable learning outcomes for BCPs."

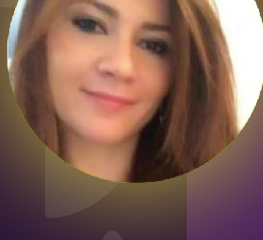

Susannah Murray,
Training & Coaching / Security Risk and Crisis Management

"With cinten platform, testing critical process has become an engaging experience and an interactive way of assessing the performance levels about crises management response. cinten has increased our services' spectrum and provided our clients with a unique experience. They absolutely have a higher gear... because of its user-friendly and interactive interface, the amazing set of post-simulation analytics and the supporting team!"

Iljana Mari,
Obiectiv Technology S.r.l.

"cinten is our chosen platform for helping our clients run simulated desktop exercises. The ability to build in a client's IRP/BCP/Crisis plan and compare expected results to actual simulated results is an absolute winner.

The capability to see and adjust the interactivities of critical stakeholders within a plan is made more visible through the use of the platform.

Highly recommended for any type of IRP/BCP/Crisis management exercising."

Eugenio Maiolo,
Principal Consultant at Trusted Impact Pty Ltd

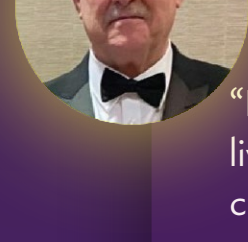

"cinten is an outstanding programme and platform. We have integrated cinten into almost every aspect of our corporate training and client engagement. cinten has literally been a game-changer for us, giving us opportunities to develop programmes and deliver services

(and therefore, help create greater levels of safety and security for our clients) that simply would not have been possible without it.

I am a fan!"

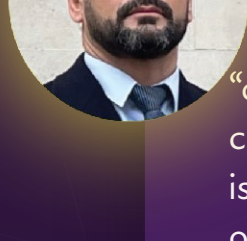

Dr. David Rubens,
Executive Director, The Institute of Strategic Risk Management

"I recently participated in one of the live exercises. Very intuitive, challenging and practical for a multi role player scenario session. I highly recommend it and look forward to further developments as the applications of the system continue to expand."

Les Allan,
Director of SafeGuarding Services at Heriot-Watt University,

Chairman AUCSO,
Advisory Board Member IFPO

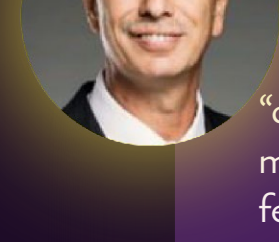

"cinten is the best platform I ever came across in the security industry it is absolutely amazing tool for any organisation that wants to improve the quality in crisis management response I strongly recommend to any type of organisation around the world if you want to be the best you got to train with the best."

Silvio Figueira,
Security Specialist Risk Management, Operations at Blackstone Consultancy

"I took part in the simulation with many other persons. The simulation was well designed, realistic, well-paced and expertly run. I am limited in my IT skills this was no barrier."

Ricky Cox,
MSSC (Dist) S.A.C. Dip, M.ISRM

"cinten is my go-to provider when it comes to table-top emergency and crisis management simulations. It is a user-friendly platform that provides many features - pre-simulation, during the simulation, and for debriefing and lessons learned. It is a must have for emergency preparedness leaders, crisis management functions and senior management. It can run any subject matter simulation, especially those that require decision making under uncertainty conditions and under stress."

Kobi Mor
Corporate Security Strategist & Thought Leader,
Coach & Mentor
