

The Alternative To Blissfully

Lumos helps IT teams go beyond SaaS visibility. We help you centralize user lifecycle management and enforce access controls through self-service.

“We looked at a variety of solutions that did part or some of what Lumos did, but what we didn’t have was a complete solution. There were ones that were designed to help reduce spending on applications, but they were very expensive and that’s all they did. And you couldn’t recoup the cost of those applications in savings, or through unused licenses. With Lumos, we get all of those features in a single platform.”

— MARK JAQUES, Director of Information Security, Vox Media

Why are IT Teams switching from Blissfully to Lumos?

Do More With Less

Using Blissfully means you have to use BetterCloud or even SailPoint, too. Lumos is all-in-one. Find shadow IT, automate on-/offboarding and make access reviews easy.

Get Compliance Ready

Time-consuming access and vendor reviews? Least-Privilege Access or Zero Trust? With Lumos, compliance enforcement is a breeze. Your auditors will love it.

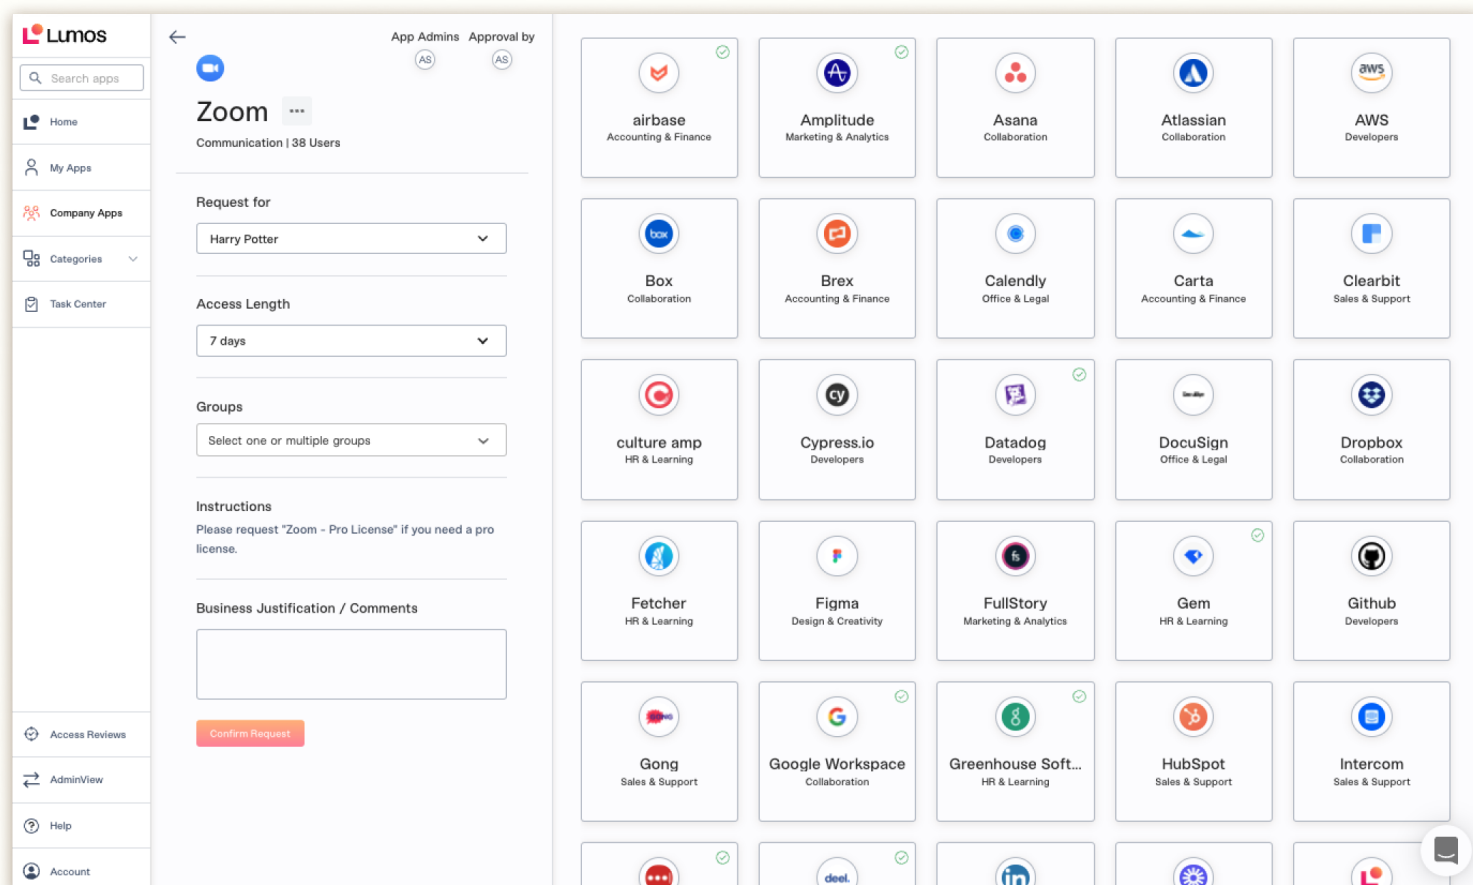

Save Time with Self-Service

With Lumos, you empower your employees to go to your Company AppStore and ask for access to apps and permissions. Automate approval flows and provisioning.

Wait, Lumos Does Really More Than Just SaaS Spend Management?

Like Lumos, Blissfully can identify shadow IT and unused SaaS licenses. Unlike Lumos, Blissfully is a point solutions for the cost management use case. Today's IT and Security teams cares about more than just costs.

That's where Lumos comes in. With Lumos, you increase workforce productivity through your self-service Company AppStore and ensure compliance readiness by automating user access reviews.

Why Choose Lumos over Blissfully?

The mission of IT & Security teams is to empower employees to be more productive with great tools, while keeping the company compliant & secure. Reducing costs is not the main or only challenge that you have. It's time to level up to a SaaS management platform that also enforces compliance and boosts productivity.

	 Lumos	 Blissfully
Shadow IT discovery	✓	✓
SaaS Spend Report	✓	✓
Analysis of Unused Licenses	✓	✓
License Removal Automation	✓	✗
Self-Service AppStore Give employees the freedom to browse and request access to company-approved apps. Cut down on support tickets with automated account creation, app requests, and approvals.	✓	✗ *only a static app catalog
Time-based access requests Minimize security risks due to over-provisioning by granting access to apps for a limited time.	✓	✗
Intercepting & Resolving IT Tickets with AI Find and intercept app requests in your ITSM before they reach your IT team's queue. Resolve access requests and log the activity in Lumos and your ITSM.	✓	✗
Access Request Audit Log Gather all the app access evidence you need for SOC2 audits. Keep track of every employee who requests, gets approval for, and uses every app across your enterprise.	✓	✗
Automated Access Reviews Say goodbye to the endless spreadsheets, VLOOKUPS, IT tickets, and back-and-forth with your auditor. Lumos automates user access reviews to keep your company compliant and safe, all in one place.	✓	✗
One-Click Compliance Reports Consolidate the evidence needed for SOC2 user access audits into one easy to read report.	✓	✗
