## ION

RP-E-2306

Drawing inspiration from the Ionic discipline of ancient Greek architecture, Ion examines classic architectural cues and alloys them into a contemporary and sophisticated outdoor lantern collection. Ion's signature glass colonnade hints at the appeal of fluted glass, whilst being distinctly unique.

Once illuminated, Ion reveals new structural elements as warm, ambient lighting filters and refracts through the tubes cascading to the base. An ability to interchange these glass tubes with opaque columns allows control over lighting directionality. With two scales tailoring to different applications, Ion presents a refined and versatile design choice for fixed mount architectural lanterns and bollards.

## RAKUMBA DESIGN TEAM

The phrase 'Making Beauty' truly represents why we do what we do. We're passionate about lighting and about authentic design.

Rakumba's design team is focused on beauty, detail and going beyond the ordinary. Rakumba Design is present at every stage of making the beautiful decorative lighting we offer.

Our people all contribute to the design thinking behind our products, ensuring that the collaboration we value reflects individual expertise and experience. We collectively solve problems and manage risk through a design-led approach, which is critical to our advancement and progress in lighting design, manufacturing and technological integration.

We think it's important for every product to have its own story. We concentrate on narrative and form, materiality and manufacturing techniques. It's all part of our ethos of uncompromisingly driving for perfection, achieving complex products that appear effortless.

At Rakumba, design is critical to making beauty.
