

## Crescent Sconce by Studio Enti

The Crescent Sconce is a curved porcelain wall light crafted in Sydney, Australia. Inspired by a waxing moon, its form casts a soft arc of illumination that can be directed upward or downward depending on installation.

Sitting flush to the wall, Crescent emits light only from its opening, creating a clean, controlled wash without spill along the curve. Available in four sizes and all Studio Enti colourways, lighter tones such as White, Wisp and Cloud offer gentle translucency, while deeper hues provide a more opaque, directional effect.

Suitable for both standalone use and grouped compositions, the Crescent Sconce brings sculptural warmth and refined, hand-cast craftsmanship to hallways, stairwells, bedrooms and architectural interiors.
