

Eclipse Sconce by Studio Enti

The Eclipse Sconce is a circular wall fixture crafted in Sydney, Australia from fine Australian porcelain, designed to deliver soft, diffused illumination. Mounted slightly forward from the wall, it produces an ambient halo effect ideal for adding warmth and subtle tonal variation to residential or commercial environments.

Available in three diameters and all Studio Enti colours, Eclipse offers different lighting qualities depending on the shade selected. White, Wisp and Cloud provide partial translucency, allowing the body to glow, while deeper tones create an opaque, sculptural form with more directional output. Suitable as a standalone feature or in grouped installations, the Eclipse Sconce delivers versatility, durability and the unique material presence of hand-cast porcelain.

Small - H90 x D180mm - 0.7kg
