*translucency, **premium price suppliment

Mani Mini - Sconce

Mani Mini is a compact sconce with a delicate and playful presence. At its centre, a spherical bulb softly nestles within the porcelain shade, casting an intimate and inviting glow.

This customisable two-tone option offers creative freedom— there's room to play with contrast for a bold statement, or keep things tonal and subtle to suit softer palettes.

Ideal for limitless internal applications from wall to ceiling, and with an IP44 rating, these pieces are also suitable for bathrooms and outdoor undercover areas.
