Eos - Ceiling Light

The classic cylindrical form of our EOS wall lights has been applied to a ceiling mounted version, creating a unique handmade offering in a contemporary, architectural design.

Appropriate for task/spot lighting or more gentle illumination based on the lamp type specified. Pieces can be cast in pure white Australian porcelain to create a stunning, glowing ceiling feature or in other shades of the Studio Enti Range for directional downlight.

Subtle glaze detailing on the piece (not on white) ties the Eos ceiling light together with the rest of the Porcelain Dusked Range.
