

VisionAir
FIDS

A unified passenger communication platform for airport operations.

Airports rely on effective communication to ensure a smooth passenger journey—guiding travelers to where they need to go, when they need to be there, and helping them explore airport amenities along the way. But managing digital screens across multiple terminal or airports while creating an experience that stands out to passengers is anything but simple. What airports truly need is a solution that's simple to manage yet offers an extraordinary, engaging experience for passengers—one that transforms every touchpoint into something more intuitive and impactful.

VisionAir FIDS gives you complete control over your digital display network—no matter how many screens, locations, or data sources you manage. With built-in scalability, hardware-agnostic capabilities, and real-time content updates, you can deliver the right information at the right time. Whether displaying flight data, wayfinding information, or commercial content, VisionAir keeps everything synchronised, ensuring great experience for passengers, visitors, and staff alike. Because in high-traffic environments, every piece of information matters.

Scale Your Operations, All From One Unified Platform

Whether you're adding new zones or terminals—VisionAir grows with you. With unlimited screen support and no fixed screen licensing, there are no hidden costs as you expand, giving you the freedom to grow without restriction. No matter how many screens you add, managing and scheduling content across multiple zones remains as simple as it was on day one. Plus, with the ability to easily manage users, you can grant access to the right people at the right time, ensuring collaboration across your teams.

A unified content platform. Limitless growth.

Complete Control & Flexibility Over Displayed Content

VisionAir puts you in full control of every screen, whether inside the airport or out. Update flight details, wayfinding, or emergency messages in real-time, from any device, no matter where you are. With an intuitive dashboard, it's simple for anyone to manage content, even with no technical expertise. Customisable user permissions and workflows ensure that only the right people have access to the right content, giving you complete oversight and flexibility.

Manage airport content on your terms—anytime, from anywhere.

Create Memorable Passenger Experiences

Craft experiences that extend beyond flight information, turning airports into vibrant hubs with dynamic content across every touchpoint—from wayfinding to advertising. With easy-to-use business rules, you control what, when, and how messages are displayed—ensuring they're relevant, clear, and engaging. In times of emergency, you can instantly override scheduled content to deliver critical messages.

Transform every interaction into an opportunity to enhance the passenger experience.

AirportLabs Product Portfolio: Unifying Expertise, Innovation, and Seamless Integration

Industry Expertise: Developed by a team with deep aviation industry knowledge.

Cloud-based Architecture: Responsive design and accessible across any platform, ensuring seamless functionality anywhere.

Data Integration: Effortless integration with any data source or third-party system, backed by automatic data capture.

Learning Academy: We offer comprehensive training and adoption resources, such as user guides, training videos and organised workshop sessions that can be provided on-site and remotely throughout the entire life of the product.
