

GCAM

Total ground handling solution keeping operations & flights on time, from arrival to pushback.

Ground handling is more demanding than ever—rising flight volumes, tighter schedules, and the push for greener, more efficient operations mean there's no room for delays, inefficiencies, or waste. Manual-intensive processes and fragmented communication slow teams down, leading to costly errors and missed operational targets.

GCAM transforms your ground operations, ensuring every turnaround is precise and efficient. No more wasted time on manual updates or chasing after team members for status checks. GCAM empowers your team to stay on top of every aspect of the turnaround—from flight updates to task allocations. By unifying ground communication and optimising workflows, you can enable faster team responses, reduce delays, and hit every milestone on time. Because when your ground operations run like clockwork, so do your turnarounds.

Maximise Ground Efficiency, Drive Sustainable Growth

Bring every piece of your operation into a single, streamlined system, giving your team real-time visibility and the power to act instantly. Flight details change? Update departure or arrival info in seconds. Priorities shift? Reassign tasks on the fly. Milestones approaching? Track TOBT countdowns with precision. Whether it's a last-minute schedule adjustment or a critical turnaround decision, GCAM keeps your team ahead of every challenge.

Because the best-run airports don't leave efficiency to chance.

Total Ground Visibility, Reduce Flight Delays

GCAM gives your team instant visibility into every aspect of the turnaround, allowing them to stay on top of every movement on the apron. With live flight data at their fingertips, they can see real-time progress and potential delays, from aircraft layout to stand availability. Need to dig deeper? Access detailed flight reports, including task history and timestamps, to pinpoint the root cause of any setback.

Get flights out on time, every time.

Flawless Ground Coordination, Faster Turnarounds

Everything your teams need to stay in sync—from task to flight updates, all accessible in real time. Whether it's through the unified messaging centre or the TCO app, these updates are effortlessly shared supporting fast and informed decisions. GCAM connects your entire ground operation, turning complexity into clarity, and ensuring every turnaround is quick, precise, and on time.

Clear ground communication, faster turnarounds.

AirportLabs Product Portfolio: Unifying Expertise, Innovation, and Seamless Integration

Industry Expertise: Developed by a team with deep aviation industry knowledge.

Cloud-based Architecture: Responsive design and accessible across any platform, ensuring seamless functionality anywhere.

Data Integration: Effortless integration with any data source or third-party system, backed by automatic data capture.

Learning Academy: We offer comprehensive training and adoption resources, such as user guides, training videos and organised workshop sessions that can be provided on-site and remotely throughout the entire life of the product.
