

The mobile hub for all airport teams to stay connected, resolve issues, and keep operations running smoothly 24/7.

Airports are busier than ever, with operations growing more complex and fast-paced. Teams must make quick decisions and adapt to unexpected changes, all while managing fragmented communication and limited resources. Transformation is no longer optional—it's essential.

Built to unify all operational teams on one platform, the Airport Community App puts your entire airport in the palm of your hand. Trusted by over 60 international airports around the world, this mobile app centralises communication and saves valuable time and resources through real-time collaboration. Whether it's fixing issues before they arise or optimising passenger movement, Airport Community App is the ultimate solution to keep operations running at peak performance.

Keep Your Airport's Teams in Sync (No Matter Where They Are)

Unify communication across your entire airport. Built with accessibility in mind, the app works on any device—keeping teams informed wherever they are. During disruptions or critical events, high-visibility alerts ensure smooth operations without relying on costly SMS. With unlimited users and unlimited notifications, every team stays connected with zero hidden costs.

One app. One airport. Fully connected.

Centralise & Simplify Your Operational Processes

Stay on top of every flight with a clear, real-time view of flights, key metrics, and timelines with the app's intuitive Flights List. Get ahead of passenger movement with live waiting time insights that help you keep operations flowing. And when issues arise, every team member can log, report, and resolve issues directly from their mobile device—ensuring nothing gets missed.

Fewer delays, faster decisions, smoother operations—every time.

Digitise Your Airport's Workflows

Say goodbye to clunky, manual tools and scattered systems. Digitise your airport's workflows with an intuitive interface that's easy for everyone from day one. Centralise critical content—whether it's PDFs, videos, or updates—so teams always have what they need. Store passes and credentials securely in a digital wallet, and give staff instant access to passenger FAQs for quick, confident assistance.

Welcome to the future of digital airport efficiency.

AirportLabs Product Portfolio: Unifying Expertise, Innovation, and Seamless Integration

Industry Expertise: Developed by a team with deep aviation industry knowledge.

Cloud-based Architecture: Responsive design and accessible across any platform, ensuring seamless functionality anywhere.

Data Integration: Effortless integration with any data source or third-party system, backed by automatic data capture.

Learning Academy: We offer comprehensive training and adoption resources, such as user guides, training videos and organised workshop sessions that can be provided on-site and remotely throughout the entire life of the product.
