New Zealand's most adaptable fencing system

***SECTOR Fencing is a simple,
modular, easy-to-build fencing
system, designed and manufactured
right here in New Zealand.***

Our fencing systems have been “built tough”. From the harsh UV conditions of Hawkes Bay & Nelson to the brisk southerlies of Wellington and Invercargill - we’ve considered it all, so you can be confident your fence will look new for years to come.

Want to mix it up? Our modular system enables you to mix and match all 6 of our Sector fencing systems. Different material? Different colour? Different height? No problem.

COLOURED STEEL GATE

BORDERLINE

FRONTIER

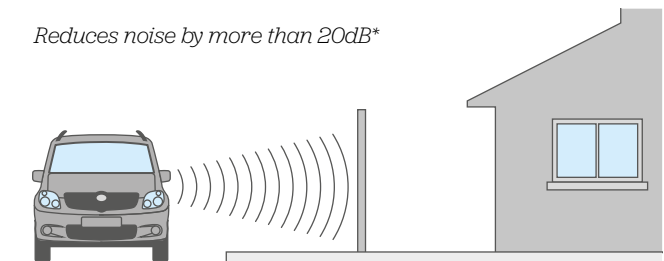

Why choose **SECTOR**?

Sound

Our Blockade solid wall fencing system is manufactured in-house using high quality materials. The laminated composite panels have been specifically designed to reduce noise, while still offering the resilience and longevity that our customers have come to expect. In testing, the Blockade system reduced roadside noise by up to 20dB! Thanks to the fibre-cement outer laminate, the surface can be painted directly using standard external paint or a textured coating system. No sanding, no priming, no worries!

*Reduces noise by more than 20dB**

*Applies to Blockade only.

Simple

The Sector Fencing range is a “DIY” product. We’ve worked hard to “keep it simple” for our customers. Simply measure your space, calculate the number of posts/panels, and you’re good to go. First time DIY’er? Not sure of what you need? Give our friendly support team a call. No robots or automated call services here, we’re real, and we’re happy to help.

0800 235 2473

Fast

Time is precious, and we recognise that ease and speed of installation can be an important factor when deciding on what fence to choose. Our modular system makes install FAST! Once your posts are secured, our Panel Fencing simply slides into the “C posts”. This more than halves the time of install when compared to traditional Timber fencing methods and means most residential projects can be completed in just 1 - 2 days.

Stunning and adaptable

By including decorative slats, the **Styleline** panel system creates a stylish and customised look to complement the features of any home. Opt for slats with **Borderline** sheeting sections for a cost-effective solution, or use **Breezeline** to enclose and protect private areas. Our **Frontier** (Steel) and **Breezeline** (Aluminium) fencing systems are available in up to 9 standard colours. Colour options vary between fence types. These standard colours have been specifically selected to compliment New Zealand’s most popular cladding and roofing colours, so you are bound to find a colour to suit. Need a specific colour? Contact our support team and ask about our in-house painting and powder coating service.

Made in New Zealand

Made in New Zealand from high quality components, the system offers a strong and durable boundary solution.

10
YEAR
WARRANTY

Satisfaction guaranteed!

If any component of the supplied fence fails – we will replace it!

Ensure your fence is built and secured to our supplied instructions as a minimum.

The warranty does not cover damage or loss through act of God.

***5yr warranty for Blockade and Styleline fencing options**

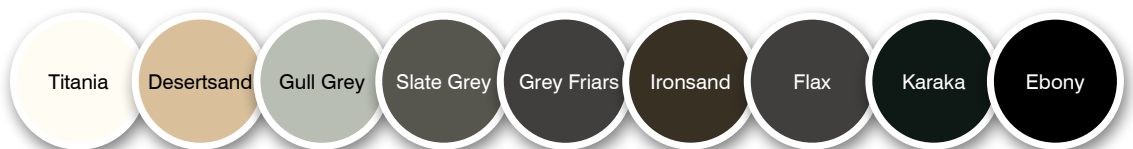

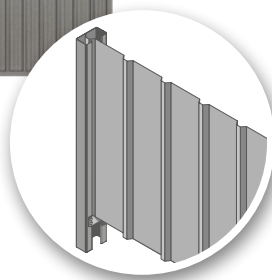

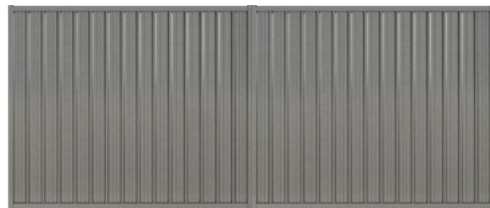

FRONTIER

Strong and durable coloured steel sections

SFR 1.8 – 1800 H x 2300mm W

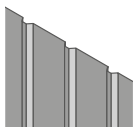

SFR 1.5 – 1500 H x 2300mm W

fit post cap

Anti-rattle top rail

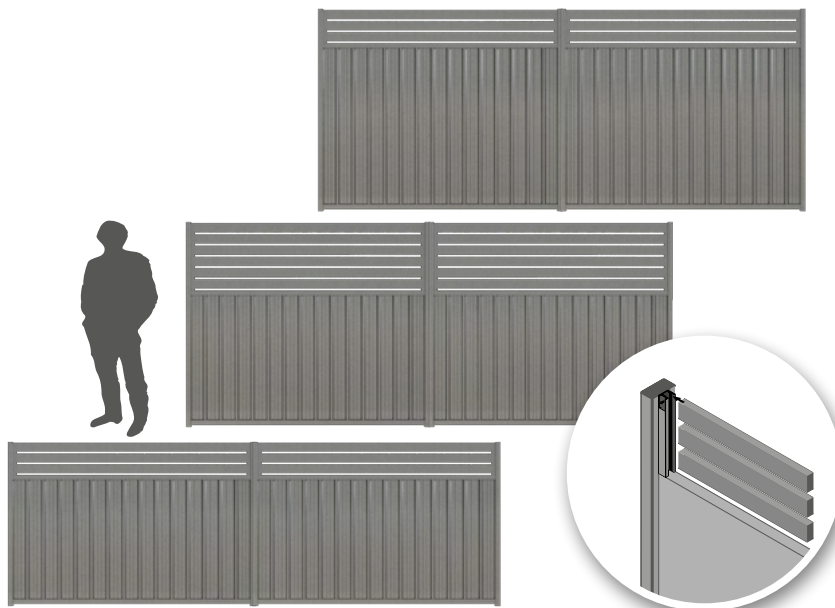

Anti-rattle
bottom rail

Assembly required –
all fixings are supplied.

BORDERLINE

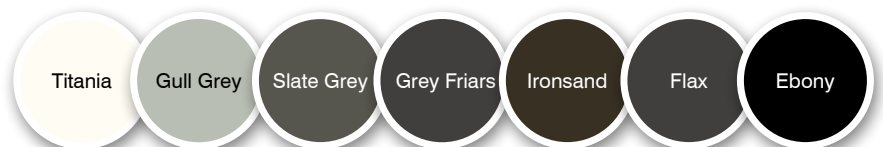

Durable coloured steel sections with rail trim

SBO 1.5/300 – 1800 H x 2300mm W
including 300mm high slat infill

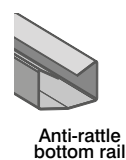

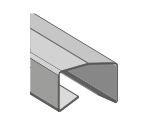

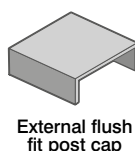

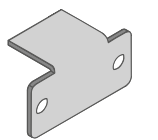

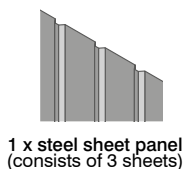

SBO 1.2/600 – 1800H x 2300mm W
including 600mm high slat infill

SBO 1.2/300 – 1500 H x 2300mm W
including 300mm high slat infill

Colours: Post and insert colours can be combined. Colours must be specified on ordering.

Each BORDERLINE panel includes:

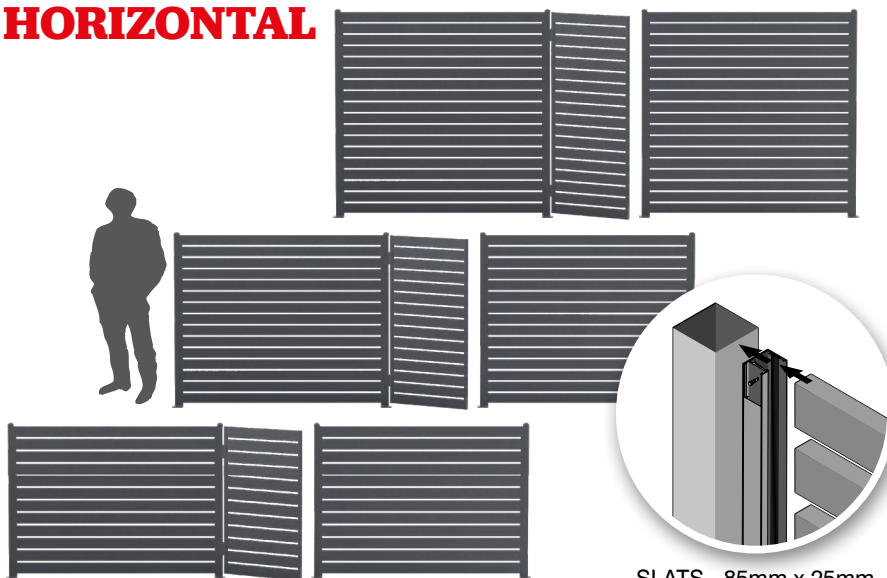

Assembly required –
all fixings are supplied.

BREEZELINE

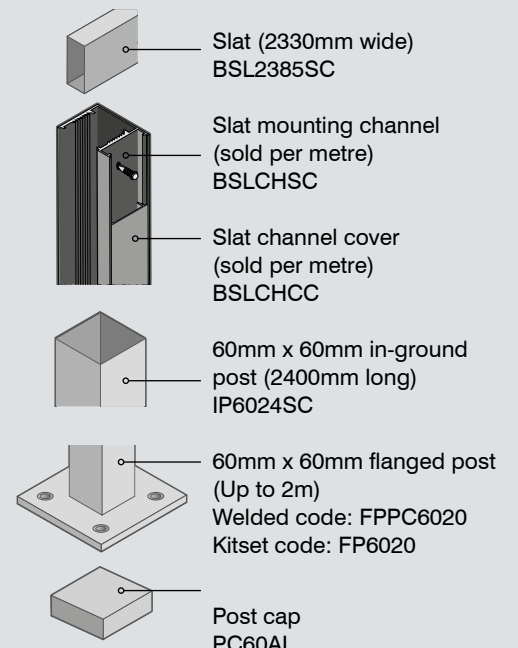

Secure with that open feeling

HORIZONTAL

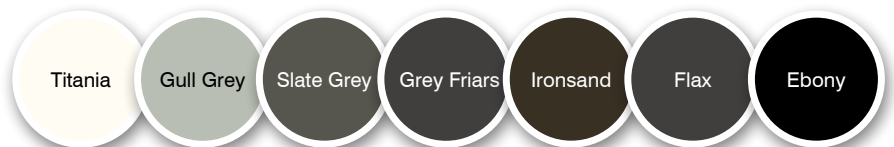

SLATS - 85mm x 25mm

In addition to the SBR 1.8, SBR 1.5 and SBR 1.2 panel kits, we can also supply Breezeline components individually:

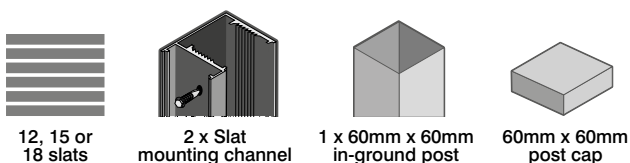

SBR 1.8 – 1800mm high x 2410mm wide
SBR 1.5 – 1500mm high x 2410mm wide
SBR 1.2 – 1200mm high x 2410mm wide
(15mm gap between slats)

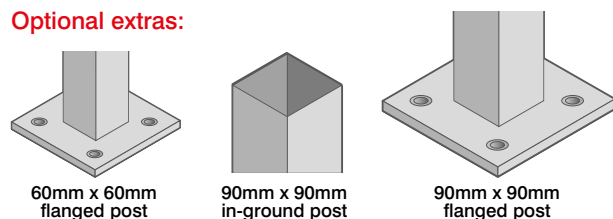

Colours: Post and insert colours can be combined. Colours must be specified on ordering.

Each BREEZELINE panel includes:

Optional extras:

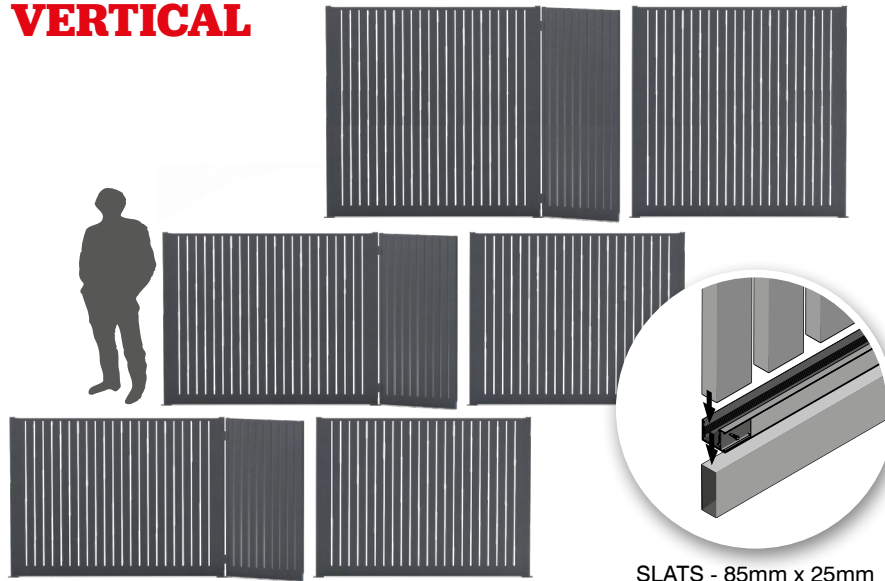

Assembly required – all fixings are supplied.

BREEZELINE

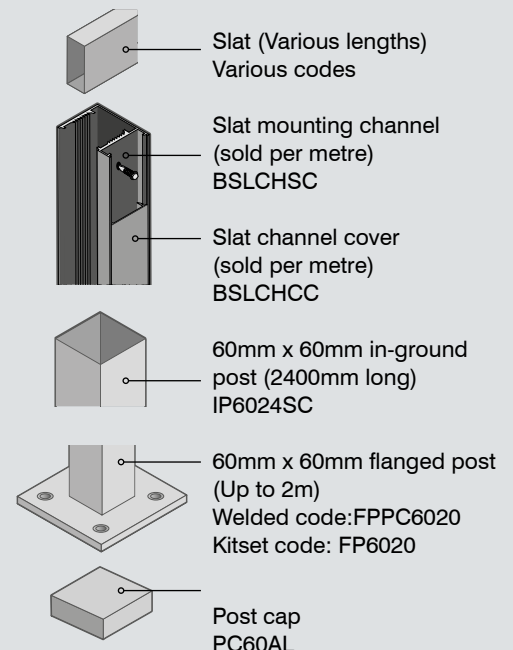

Secure with that open feeling

VERTICAL

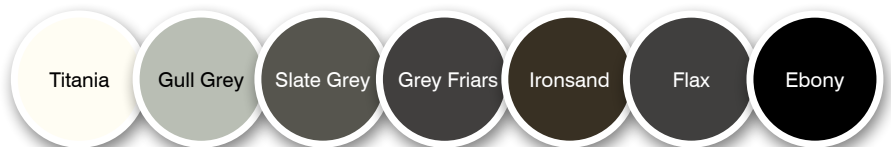

SLATS - 85mm x 25mm

In addition to the SBR 1.8, SBR 1.5 and SBR 1.2 panel kits, we can also supply Breezeline components individually:

BSV1824 – 1800mm high x 2410mm wide
BSV1524 – 1500mm high x 2410mm wide
BSV1224 – 1200mm high x 2410mm wide
(15mm gap between slats)

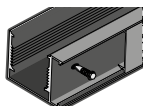

Colours: Post and insert colours can be combined. Colours must be specified on ordering.

Each BREEZELINE panel includes:

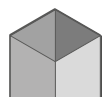

24 slats
(23 Vertical
1x Base)

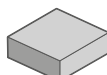

2 x Slat
mounting channel

Ordered Separately:

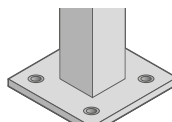

1 x 60mm x 60mm
in-ground post

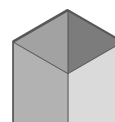

60mm x 60mm
post cap

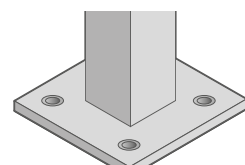

Optional extras:

60mm x 60mm
flanged post

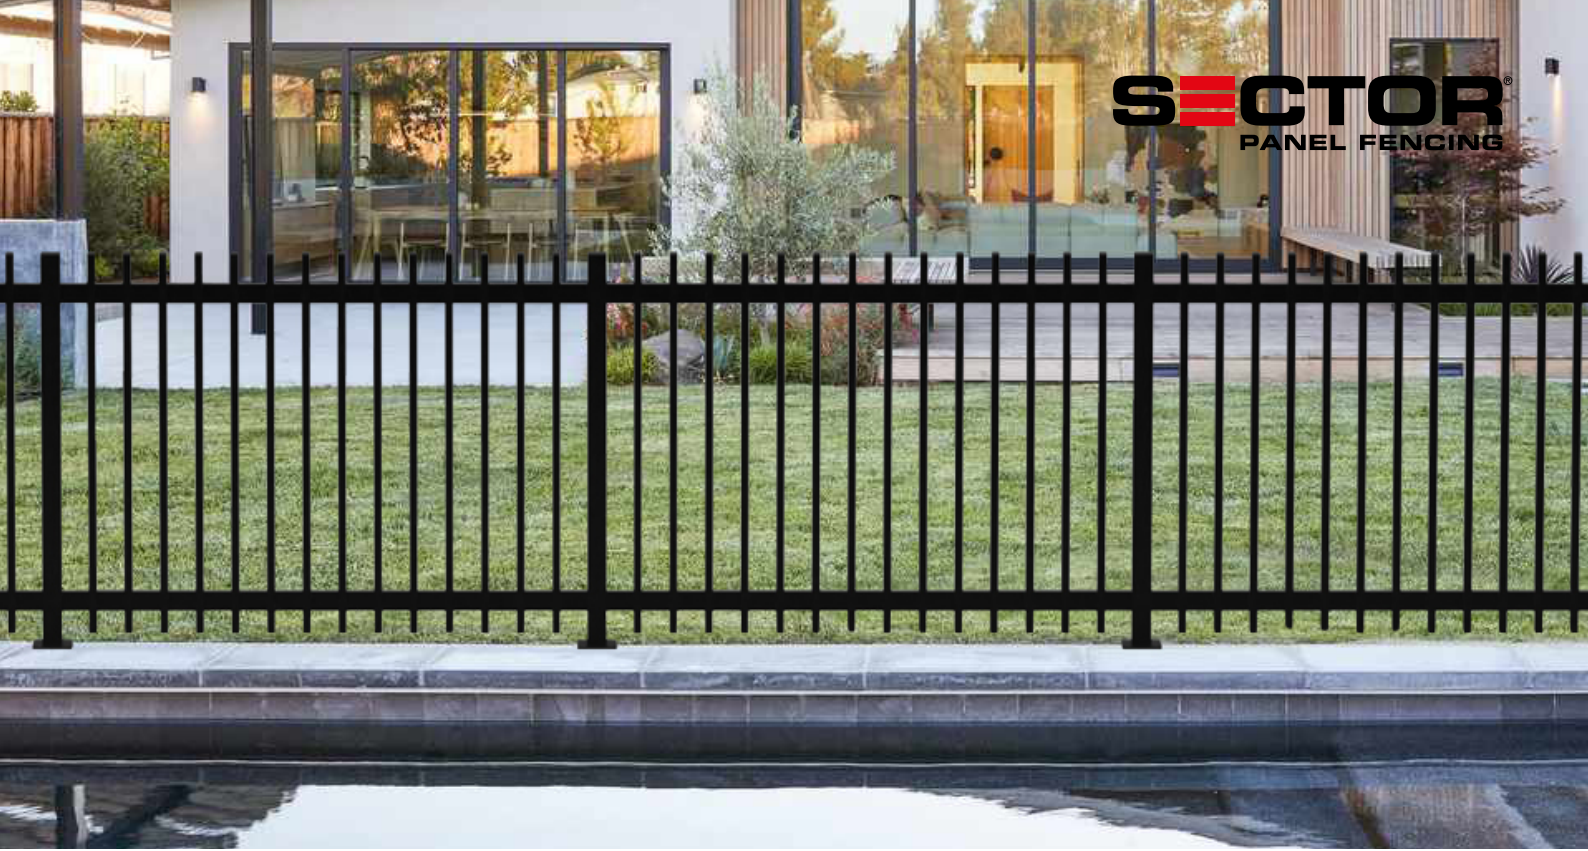

90mm x 90mm
in-ground post

90mm x 90mm
flanged post

Assembly
required –
all fixings
are supplied.

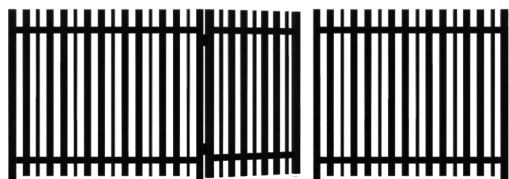

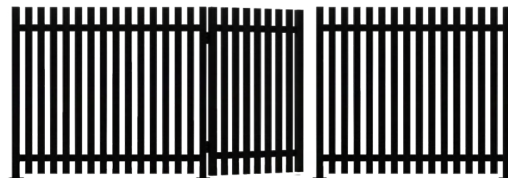

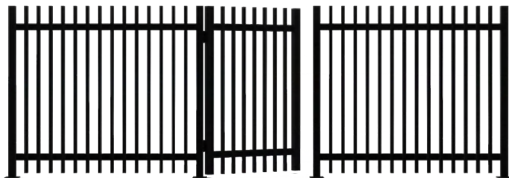

AURORA

Secure with that open feeling

The Aurora pool / balustrade panel is fully compliant to F9 Pool fencing and F4 Balustrades. PS1's available on request

THE POOL / BALUSTRADE PANEL

Post Centers: 1650mm

Capping channel bottom

Assembly required – all fixings are supplied.

HORIZONTAL SLATTED GATE
Code: SSLG

COLOURED STEEL GATE
Code: SSHG

ECO SLAT
HORIZONTAL Code: ECSG

GATES

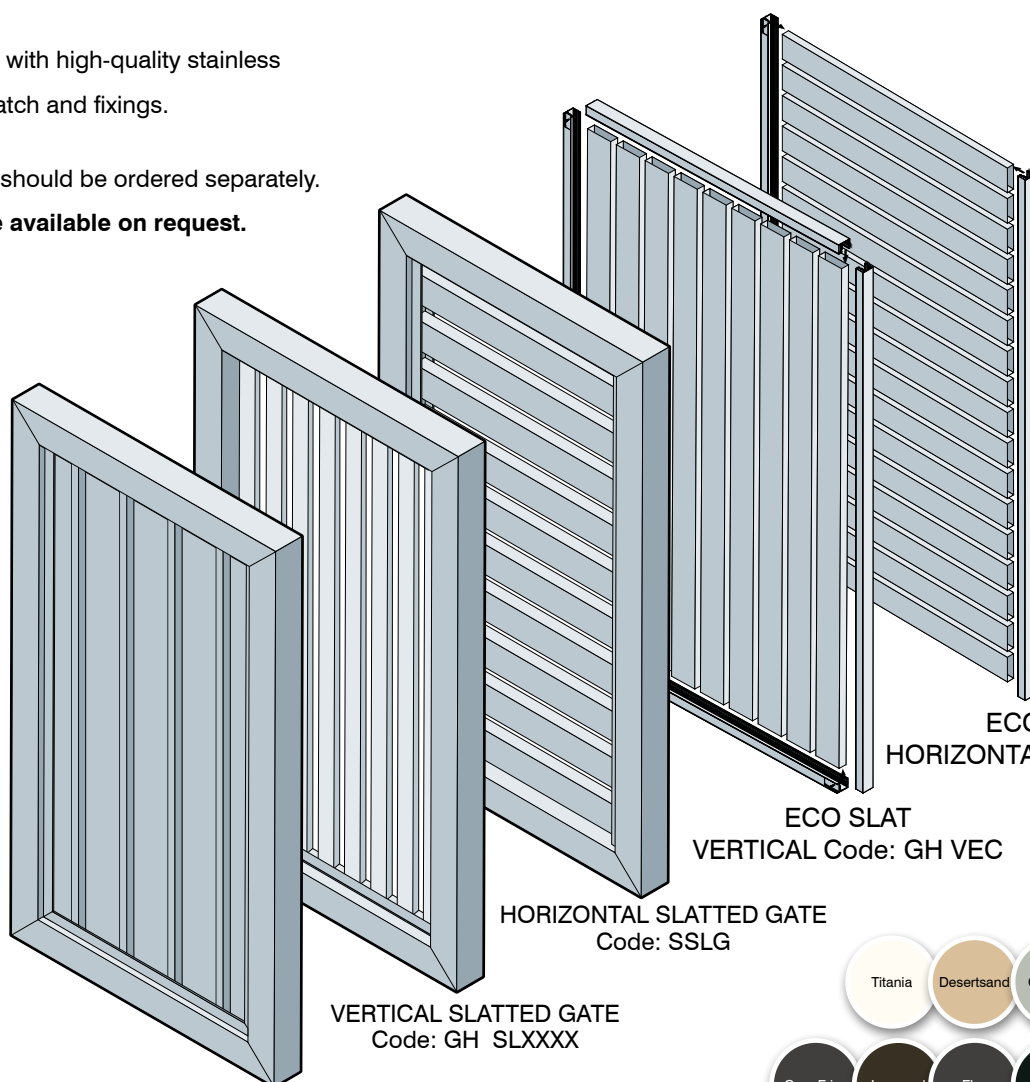

Sector offers welded framed gates in both sheet metal and slatted styles, to compliment any space. Standard sizing would be 900mm wide by 1200mm, 1500mm or 1800mm high – but custom sizing is also available on request.

Inclusions:

ALL Sector gates come with high-quality stainless steel hinges, lockable latch and fixings.

Gate posts, if required, should be ordered separately.

Custom gate sizes are available on request.

COLOURED STEEL GATE
Code: SSHG

VERTICAL SLATTED GATE
Code: GH SLXXXX

HORIZONTAL SLATTED GATE
Code: SSLG

ECO SLAT
VERTICAL Code: GH VEC

ECO SLAT
HORIZONTAL Code: ECSG

Colours:

Gate and post colours can be combined.
Colours must be specified on ordering.

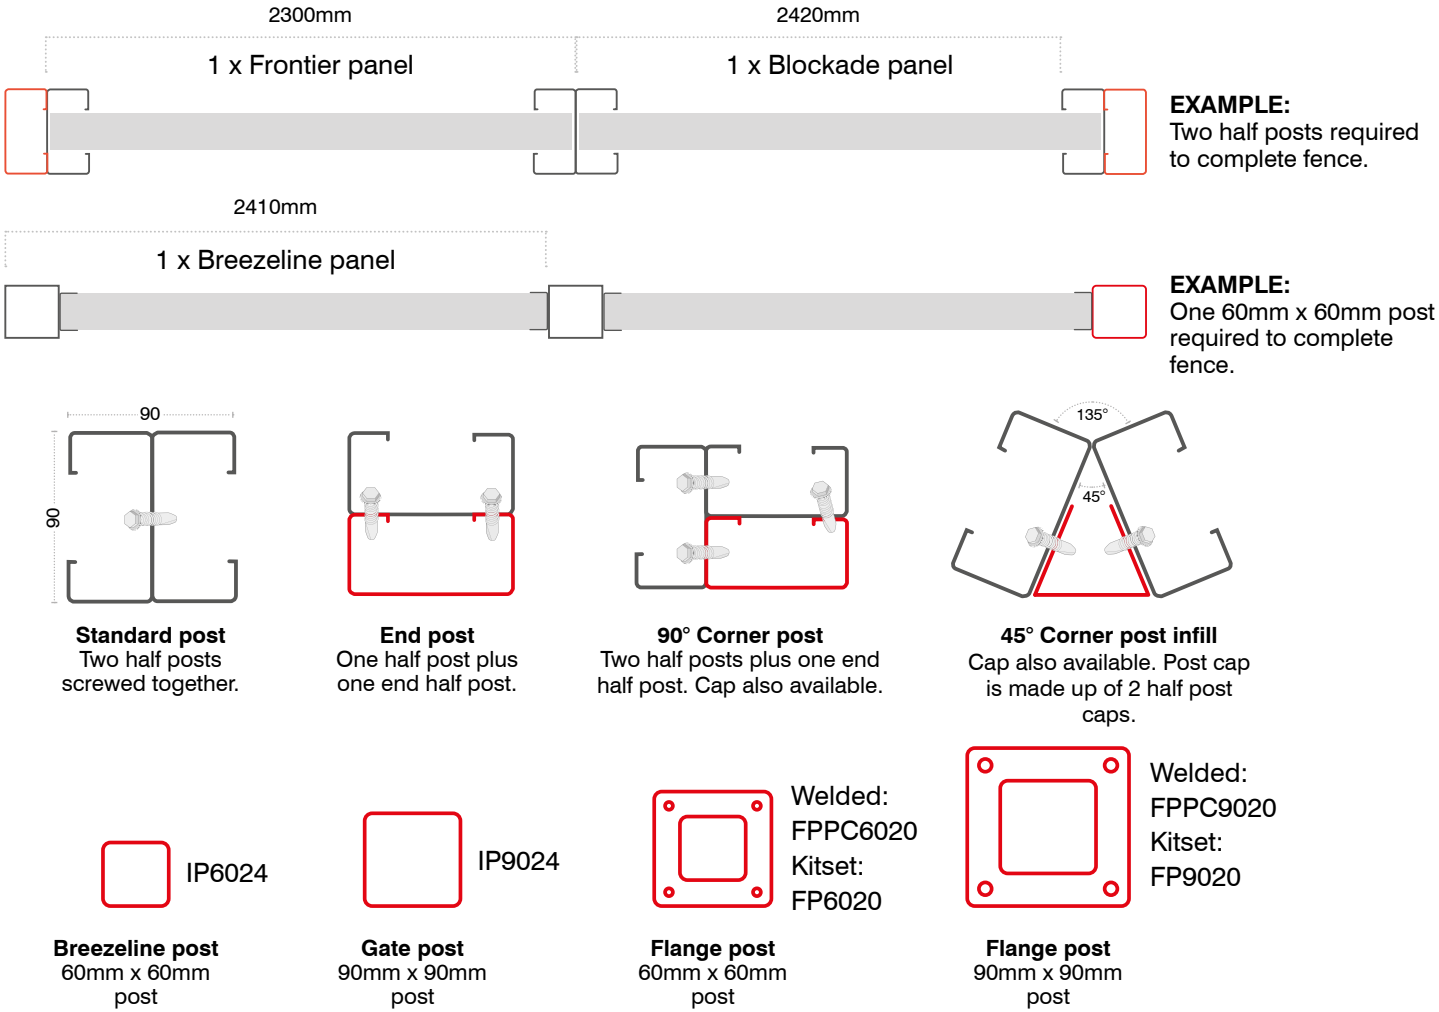

ECO GATE KIT

Eco-gate kits harness your DIY potential, by being supplied in kitset form (channels, slats & fixings).

Easy to put together and reliable when constructed – giving you that sense of accomplishment without breaking a sweat.

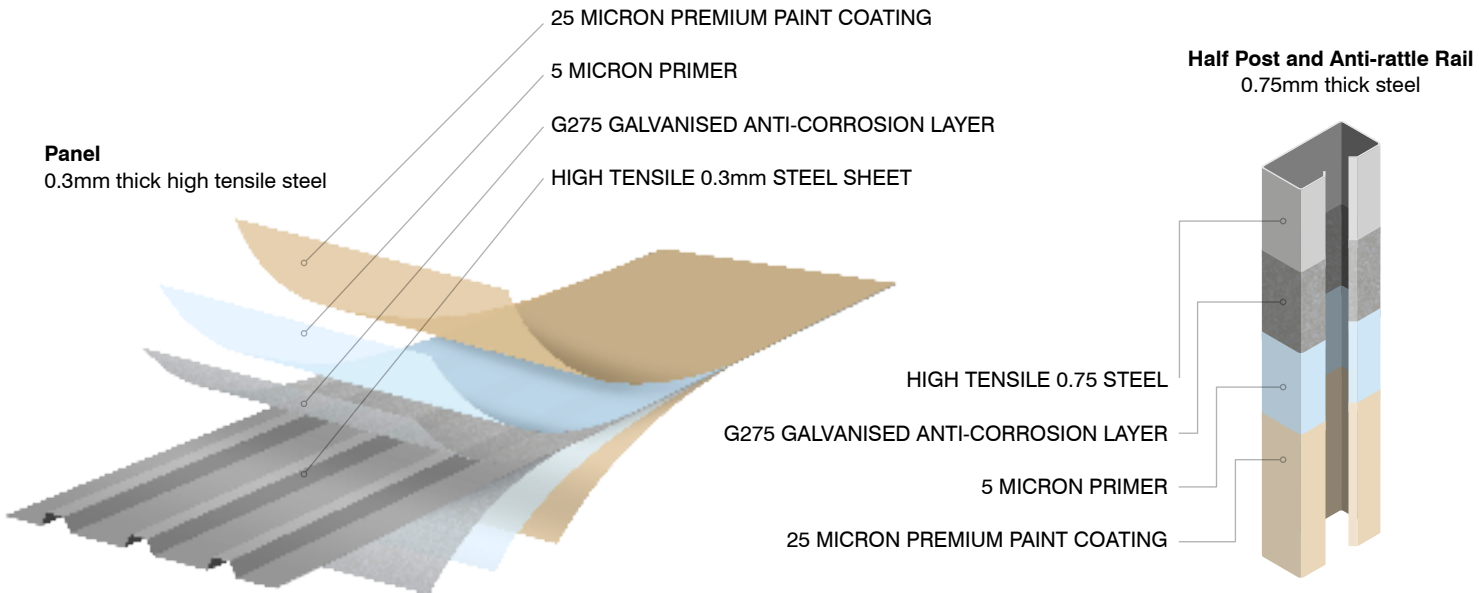

POST CONFIGURATIONS

Below are the different configurations for the sector posts.
Each panel comes with two 90mm x 45mm half posts or one 60mm x 60mm post (Breezeline), so you only need to order the additional elements in red to achieve your desired configurations.

SECTOR FEATURES

Our 0.3mm high tensile sheet steel (0.75mm for posts and rails) is thicker than that of many of our competitors, and receives three generous coatings, on both sides, to ensure maximum protection from corrosion.
