

This project is a massive data center with thousands of workers a day.

#### KEY SOLUTIONS USED

- Worker Registration and Onboarding
- Access Control and Management
- Video Surveillance and Monitoring
- Worker Time Tracking
- Worker Text Messaging

#### HOURS SAVED WEEKLY / TASK

|     |                                                                                                                     |
|-----|---------------------------------------------------------------------------------------------------------------------|
| 7-8 |  Worker Registration & Onboarding |
| 7-8 |  Attendance & Time Tracking      |
| 5-6 |  Mass-Texting Workers            |
| 10+ |  Access Control & Site Security  |
| 3-4 |  Headcount & Workhour Reporting  |

Total Weekly Time Saved  
**36+ HRS**

#### ADVANTAGES OF EYRUS

*"Eyrus was a new system that our team wanted to check out. Now, we utilize Eyrus every morning to verify and approve new workers coming onto our worksite and check the status of future employees as requested by companies. Eyrus allows us to manipulate badge access, send communication, access contact info and review timesheets."*

*"How simple it is. Not too many buttons and easy to explain to someone who is new to the program."*

Project Administrator

*"Being able to mass text the work force is great. I also appreciate that it works quickly when you update the access permissions. I also like the photos of employees to help identify workers who have the same name."*

Safety Administrator
