

Project Impact Report

Kind Farm Services chose Eyrus to help provide worksite security and workforce tracking on a greenhouse project for their customer, Dalsem.

Key Solutions Used

- Workforce onboarding and badging
- Worksite access control
- Storing safety and certification records
- Time tracking workers, companies, and trades
- Timesheet reporting for payment processing
- Worker fatigue and worker safety reports
- Sending site-wide alerts and warnings (e.g., storms) supporting the Emergency Action Plan and evacuation procedures

TIME SAVED

TASK

4 hrs/week	Worker Onboarding
9 hrs/week	Worker Time Tracking
4 hrs/week	Site Access Control
8 hrs/week	Timesheets Reporting

Total Weekly Time Saved

25 HRS

Advantages of Eyrus

Barzin Zare, Project & Construction Manager, Kind Farm Services

"We use Eyrus to provide a clear (simple), structured, and reliable overview of the people involved in the project. More than 450 people have visited the construction site for our project so far. Without Eyrus, we would not have been able to collect, manage, and analyze this amount of data. Eyrus not only helps us maintain an overview, it also increases our efficiency."

Adriane Kramer, Site Safety & OSHA Compliance Manager, Kind Farm Services

"I use Eyrus for Site Safety. I keep track of how many people are on site and when they were on site. Orientations, badging, collecting certifications, fatigue reporting, and communicating with the workforce are a must for our office."
