

Type:

Shallow lines of light with IP65 rating for exterior (or interior) applications.

Mounts on or within hard surfaces.

Remote driver for easy maintenance & maximum life.

Order in any length for precise fit.

1.75" depth meets ADA when surface mounted.

Illuminated corners: Inside, Outside, Left or Right.

## Environmental Data

For 6E lamping at 3500k :  
W: 6.0W/ft (20W/m)  
LLD: 50,000hrs @ 70%lm  
16ft (4.9m) on one 100w driver

Ambient Temp: 0° ~ 122°F (-20 ~ 50°C)  
No Mercury, No UV, No Flicker  
Warranty: **3** years  
cETLus Wet Listed IC Rated

Remote power supply separates the heat from the driver & LED to maximize the lifespan of both, and allows drivers to be located indoors, if needed, for easy maintenance.

## Power Supply Enclosure Notes:

Remotely located power supply with 24Vdc Constant Voltage, output for simple Class 2 Installation.  
Electronic Drivers 50/60 Hz, 120 thru 277 input.  
Choice of 0-10V dimming or switched on/off.  
Nxx requires 8W and D010 requires 20W minimum load.  
Type A Sound Rating  
Non IC installations standard; consult factory for IC installation.  
Surface mounted or recessed in wall or above accessible ceilings.  
Housing is formed 16ga CRS with White paint finish.  
Listed for 90°C conductors with 1/2" trade size Knock Outs.

## Driver Notes:

**D010** Dimming Electronic drivers - Input 120V thru 277V, 50/60Hz. 0-10v Dimming or on/off switching. Available wattages: 100W, 60W, 40W.

**N** Electronic drivers - Input 120V thru 277V, 50/60Hz. Non dim drivers. Available wattages: 96W, 75W, 60W, 40W, 20W, 15W, 10W, 8W.

**DDMX** Digital Multiplex, Bi Directional RDM v1.0 (E1.20-2006 ESTA standard) addressable DMX decoder. Up to 5Ch output (RGBW). Input 120V thru 277V, 50/60Hz. input and output data ports are 3wire/XLR/RJ45.

**PDMX** Programmable DMX control for fixed color applications. Works well with gels or filters. Use RGB, RGBW to create a pop of color without DMX master control systems. Input 120V thru 277V, 50/60Hz. Provide R/G/B/W % or DMX value. Decoders are programmed at the factory.  
No DMX cable required between remote locations.

# Exterior HardLineLED 1.5 or 2.5 x 1-3/4"

## Housing

Extruded aluminum housing mounts via screws to structure.  
Surface material\* (metal, tile, stone, etc.) can abut housing sides.  
Anodized for superior thermal performance & weather protection.  
Weep holes in housing allows any moisture to exit fixture.  
Housings ship with 15ft CL2P cable attached to back, to reach remote power supply (consult factory for End exit). Longer lengths optional, or 12AWG wire can be added on site; up to 20' with D010 or 50' with N100 drivers.  
One-piece extrusions up to 123" (3.12m). Multiple extrusions couple together with brass barrel connector & bolt assembly plus alignment pins and or tabs for secure fit and straight alignment.  
Inside corner sections overlap for even illumination without direct view of LEDs.

## Modifications

Runs can be provided to the nearest 1/16" or 1mm.  
For unique custom work, such as sharp corners, consult factory for shop drawings.

## Transitions

When lens changes directions (Minimum length 3.875" or 98mm per side).  
"LT" Left Turn same plane (degrees 90° to 179°); pre-assembled at factory  
"RT" Right Turn same plane (degrees 90° to 179°); pre-assembled at factory  
"IC" inside corner between two planes. Housings overlap and tab together for alignment.  
"OC" outside corner around two planes; pre-assembled at factory. 90° standard, consult factory for other angles.

## LED

Fully encapsulated LED board is IP65 rated for wet locations.  
LED boards attached to aluminum heat sink at factory.  
Low wattage white light LED produces even distribution with no shadows.  
Binned within 3 MacAdam ellipses.

## Optics

Panel plugs into housing via waterproof wire nuts & is secured with screws for quick & easy replacement.  
Snap-in high transmission polycarbonate lens with matte white finish, up to 25ft per section with flush PCW lens.

## Option

"EME" (entire fixture) or EM8 (8ft section of a run) with EM labeled feed cable(s). Requires relay by others to switch from normal to EM input at driver. Dado does not provide battery packs.  
"EF" Feed cable exits end, instead of back, on 10' or shorter housings.  
"BT" Barrier Tape provides corrosion protection between aluminum and concrete, mortar, stucco, or similar surfaces.
