

# PL175 Series **Installation Instructions**

**Step 1:** Unbox fixture and identify.

**Step 2:** Dry fit and mark location for feed location exit. On mounting surface, drill a hole for feed wire to exit. (Min. of 3/4" DIA)

**Step 3:** Connect runner wire to fixture pigtail.

**Step 4:** Identify pre-drilled holes & use desired screws to mount the housing. (Drill additional screw holes as required along scribed line.)

**Step 5:** Peel back adhesive protector.

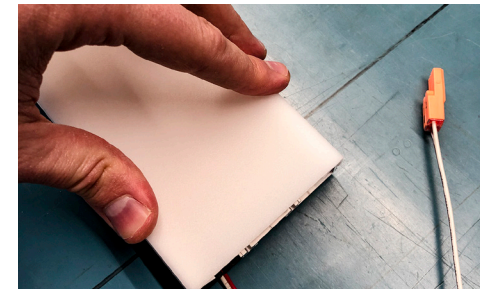

**Step 6:** At an angle, push the CLEAR (Fig. A) side of Acrylic Light Guide against the LEDs & center the length. Then rotate & push flat into position.

**TIP:** (Keep constant pressure on LEDs as you rotate the panel into place.)

**Fig A:** Acrylic Light Guide Bottom.

**Step 7:** Snap lens into place.
