

DAIFUKU INTRALOGISTICS AMERICA

Daifuku Intralogistics America's AutoRoll+™ S Motorized Roller Conveyor is a next-generation solution designed to improve material flow across warehouse and manufacturing operations. It delivers smooth, controlled product handling while reducing operating costs and complexity.

Why AutoRoll+™ S?

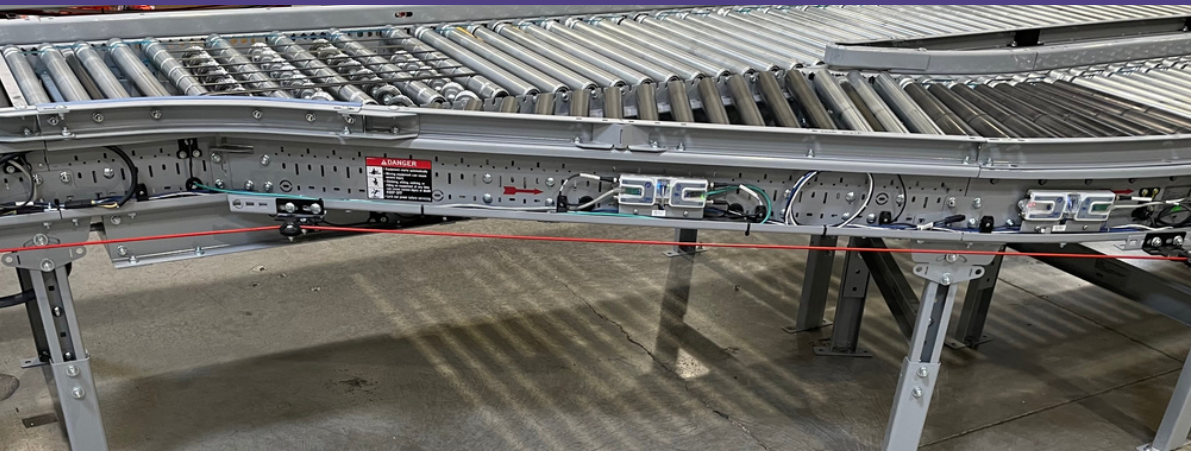

- Efficient by Design: Run-on-demand technology reduces energy use and noise.
- Protects Your Products: Zero-contact accumulation prevents product damage.
- Handles It All: Conveys cartons, totes, and polybags with ease.
- Quiet Operation: Low noise levels create a better work environment.
- Reliable Performance: Durable design minimizes downtime.

Flexible Applications

- Accumulation and buffering
- Merging and diverting
- Inclines and declines
- Curves and transport lines

About Daifuku Intralogistics America

Daifuku Intralogistics America is a leader in material handling automation, delivering innovative solutions that improve efficiency, safety, and operational performance across industries.
