

Wynsoft™ Convey

The Wynsoft™ Convey Module provides the control and software functions for routing product through the various types of material handling equipment by providing timed diverts, application of labels, merges, spacing and support for the many types of conveyor available today combine to move inventory as quickly as possible through your facility. The software portion of this module supports look-up and pass-thru information from the PLC's for rating and shipping information and interacts with various other Wynsoft™ Modules to efficiently flow product.

As material handling equipment evolves with speed and accuracy you can be assured that the Wynsoft™ Convey Module will grow with your operational needs. In addition to flowing product, the module also records milestones of movement and provides the archival of data for subsequent examination and interrogation by the Wynsoft™ Visibility Module.

Extremely Functional

- Conveyor control
- Sortation control
- Freight rating and postage

Routes Various Containers

- Cartons
- Totes
- Pallets

Our Convey Module features:

- Works in concert with other modules to coordinate the movement of product throughout your facility
- Interacts with PLC software to manage the functions of conveyor installations
- Supports live roller, AutoRoll+® MDR, belt, merge tables, sortation equipment, induction, cranes, etc.

The Wynsoft™ Convey Module is flexible and scalable, enabling it to grow at the same rate as your integrated system. Whether your fulfillment operation includes goods-to-person, voice-directed, light-directed, deep storage, e-fulfillment, or store replenishment, the Wynsoft™ Convey Module will consistently provide for the accurate movement of your goods.
