

1 Access AI Credits

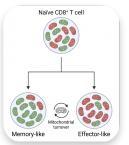

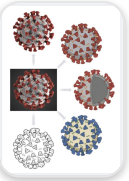

Starting
Credits

Free & Trial Users: 20
Premium & Annual Plans: 50
Enterprise & Org Members: 50

- **Individual users:** Go to Edit Profile & Settings → Plan & Billing → Manage Credits
- **Team members:** Request credits from your team admin - credits come from a shared pool.
- **Team admins:** Purchase credits and set per-user limits from the AI Credits tab in your Admin dashboard.
- **Enterprise users:** Contact your organization admin for access to the shared credit pool.

2 Choose Your AI Tool

1. **Make your own icon** 10 credits: Change the style, remove text, remove backgrounds, adjust colours, add/remove details, & make edits with a quick text prompt.
2. **Generate an Editable Figure** 20 credits: Generate a fully editable or flat image figure - built from a text prompt or reference image.
3. **Draft a Protocol/Timeline/Flowchart** 1 credit: Create an editable draft of protocols, timelines, and flowcharts from text prompts.

AI built with security in mind:

We do not use user-uploaded or any customer-created content to train our models.

3 How to Prompt - Best Practices

Make your own icon

- Select an uploaded image → click AI
- Describe a natural modification (e.g: different view, new color, or added/removed detail)
- Be specific
- Request one change at a time

Draft a Protocol/Timeline/Flowchart

- Include title and key steps
- Use bullet points or numbered lists
- AI will expand rough notes into a draft with captions and visuals
- Related icons and templates will be suggested

Generate an Editable Figure

- Be specific & summarize long content
- Edit individual elements on the canvas
- Use a text description, abstract, SOP, reference image, or sketch
- Prompts < 1,000 words
- Highlight most important components

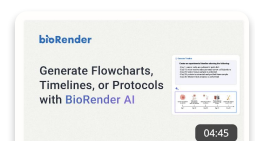

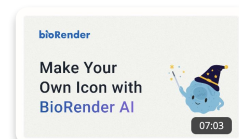

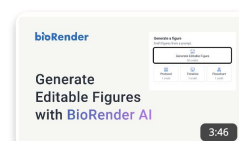

4 Training & Resources

Tips & Tricks:

-  **Flowcharts:** You can specify a left-to-right layout in your flowchart prompt. If no layout direction is specified, the default is top-down. Left-to-right layouts are especially useful for branching processes and can help save canvas space. Simply add "left to right layout" in your prompt.
-  **Prompting shortcut:** You don't need a perfect prompt - paste rough notes or bullet points and the AI will expand them into a full draft with captions and icons.
-  **You're in charge:** Our AI-powered figure drafts are created using BioRender's scientifically accurate, peer-reviewed icons. However, always review AI-generated figures for scientific accuracy before publishing. Our AI tools get you ready for a draft so you have the final say.
-  **Editing and refining:** Use "Replace selected icons" to swap any icon without rebuilding the figure.
-  **Not seeing AI Tools?** If AI tools aren't showing, disable your ad blocker for app.biorender.com and refresh.
