

Are windows/
doors **open**?

What is the
GPS location?

Is it too
hot/cold
outside of
working hours?

What is the
current and total
power drain?

Should you
remotely turn off
the HVAC unit?

Get insights from a massive job-site power consumer

Data insights on parameters that drive power consumption in job-site office-, break- and restroom trailers. All delivered via APIs to your applications.

Select the optimal data harvesting sensors from an industry focused palette of use-case specific solutions.

Data, at your service

- Wireless 5G communication
- Battery- or fixed powered
- Configurable settings (OTA)
- Easy to deploy and activate
- Data access via APIs

A modular solution for getting new job-site insights

Start with the Xtellio Gateway Xentral and build up intelligent insights for your trailer by adding Xenses that match your needs.

Gateway Xentral

Can be paired with and collect data from up to 10 Xenses, and even provide location by GPS.

-  Xense data (paired devices)
-  GPS Location

Metering Xense

Connect to your energy meters via M-Bus output, and monitor the real-time energy consumption of your trailer.

-  Meter Data (via M-Bus)

Air Quality Xense

Measures temperature, humidity and pressure, providing insights on indoor climate conditions.

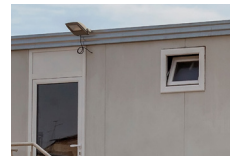

- 🌡️ Temperature
- 💧 Humidity
- ☀️ Pressure

Magnet Xense

Detects opening and closing of windows/ doors, even with event timestamps.

- 🔄 Opened/Closed

IR Xense

Can turn on/off the HVAC unit, if for instance a window or door is left open.

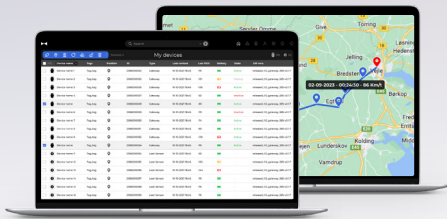

- 📡 IR (Infrared)

Xtello Picco mobile app provides easy and rapid device pairing through QR code scanning.

Xtellio Xervices

Xtellio Xervices are all part of a connected ecosystem that ensures smooth onboarding process, enables total control of your devices, and offers multiple options for integrating and extracting value from Xtellio's data-collecting devices.

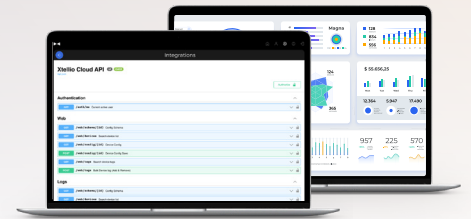

Xtellio Butler

Xtellio Butler, the web application, serves as the main command center, offering a feature-rich interface for managing your IoT devices with precision.

Xtellio Picco

Xtellio Picco, the mobile app, is your on-the-go device companion that enables you to scan, pair, and manage your Xtellio Xentrals and Xenses effortlessly when on the move.

Xtellio Suite

Xtellio Suite, our secure cloud platform, acts as the backbone and houses all your device data. Features a range of integration options, enabling you to build your preferred solution on top.
