

Eduardo Quiche

Webflow Developer · Webflow Certified Partner

Lima, Peru (UTC-5) · Works US Eastern & Pacific hours
hola@eduardoquiche.com · linkedin.com/in/eduardoquiche · eduardoquiche.com

Webflow developer with 5+ years building and maintaining production sites for US and LATAM companies. I design and build — shipping fast without breaking live sites, wiring up the integrations behind them, and using AI-assisted workflows to cut delivery time.

EXPERIENCE

April 2023 – Present

Webflow Developer · Contract (part-time)

Outcode Software — Utah, USA · Remote

Full-time through May 2025 (as contractor from May 2024); part-time since.

- Built and maintained Outcode's marketing site in Webflow, including responsive layouts, CMS architecture, and custom interactions.
- Delivered client sites end to end as part of Outcode's delivery team.
- Migrated a live client site to new hosting with no downtime or broken dependencies.

May – July 2025

Webflow Developer · Contract

Sendlane — California, USA · Remote

- Built marketing landing pages and kept Sendlane's Webflow site up to date, working closely with the marketing team.
- Integrated Zapier, HubSpot, and Google Analytics 4, aligning the site's visual and functional infrastructure.

May 2023 – Present

Global Leader

Webflow Peru

- Host in-person and online events for Webflow Peru; led a live-building workshop on Webflow's MCP (~30 attendees, Aug 2026).

2020 – Present

Webflow Developer — Independent

Selected clients: Avla (with Sinngular), Vozy, Deliveri

- Deliver custom Webflow sites end to end, from Figma spec to production — CMS architecture, responsive layouts, and complex scroll-driven interactions.
- Design and build when clients have no in-house team; work with their designers when they do, covering the states and breakpoints a handoff doesn't include.
- Use AI-assisted workflows (Claude Code, Webflow MCP) to accelerate delivery, with automated browser testing to verify each state before handoff.
- Build on documented, reusable structures (Client-First) so sites stay maintainable by the client's team after launch.
- Implement technical SEO on every build: schema markup, JSON-LD, on-page structure, and Core Web Vitals.
