KAIROS LABS

One-Stop
NFT solution
& Blockchain
Service

# Haven't found a blockchain service for your world class idea?

We provide profession Blockchain & DLT services for enterprise and entrepreneurs

" On average, a smart contract developer costs $120K~$180K per year, and a web3 frontend developer costs $90K~$150K per year. That means, an Web3 project that takes two month to complete will have a minimum cost of $35K "

Creating an Web3 project can be intimidating
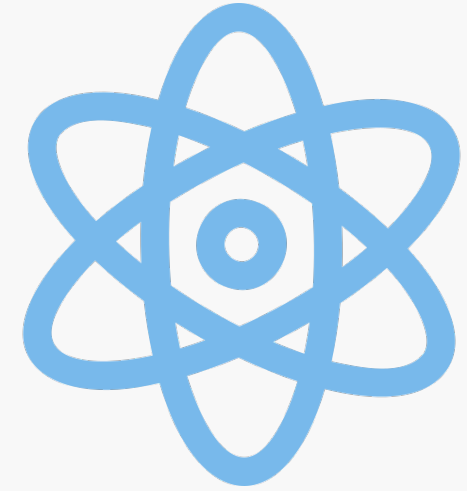

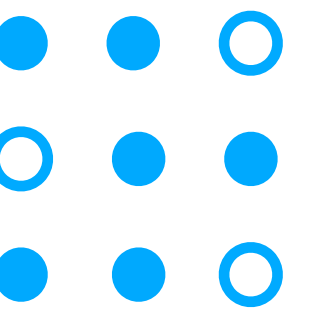

Intense Web3 Knowledge Required

Web3 is always an esoteric field. Many talented creators & artists are familiar with Web3 and are clueless on how to start
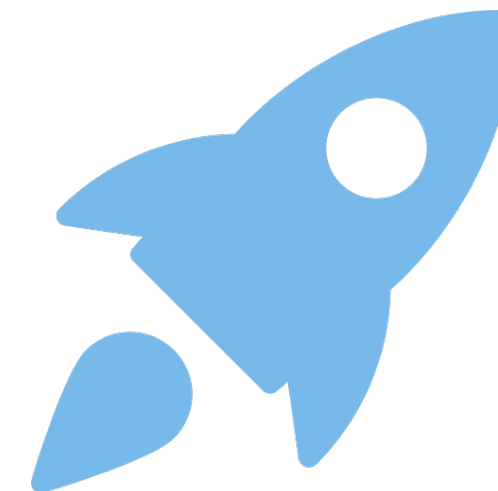

Random Image Generation

Thousands for profile picture or artwork cannot be painted in a short amount of time. However, 3D & 2D random generating is complex, requiring knowledge in canvas, maya, etc.

Security Exploitation Concerns

Any security issue will make tremendous damage on projects and community. Many projects get snipped or rugged.

Growth & Marketing is hard

Community is the cornerstone of every project. Bootstrapping user base is hard and requires much upfront investment.

Mundane Coding Needed

Barrier of entry is high. A projects need knowledge of coding for not only in web development, smart contract but also for infrastructure and more.
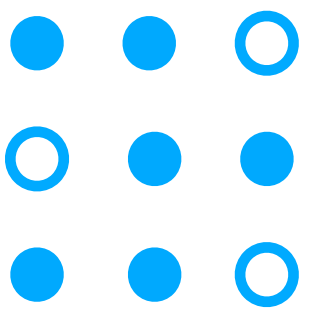

Steep Learning Curve

Better user-onboarding education for both creators & users is needed. Feeling lost will deter the motivation of learning in web3

Our all-in-one solution handles every technical needs, so clients can focus on innovation

|	Typical Web3 Project	Kairos Labs
Artwork	Artist	Project owner provided
Website	Frontend Seveloper	✔ Included
Web security	IT/ Network Specialist	✔ Included
