
Heating Cable

Electric heating cable provides reliable heating for a range of applications such as underfloor heating and preventing frost build up in gutters, drains, and pipes.

Argus Heating can design and manufacture silicone and PTFE heat cable to suit your requirements.

Applications

Typically used for:

- Preventing condensation from display units.
- Preventing frost/ice build-up in freezers.
- Underfloor heating and heated towel rails to keep homes warm and dry.
- Warming drains to prevent freezing/fat build up.

Our heating cables are available in 100m and 500m dispensing reels, or cut to length. Assemblies can be terminated with a variety of cold tail or power cord options.

Features and benefits

- Cables are made to specific wattage, length, and termination requirements. A variety of cold tails and power cord options are also available.
- Robust and can withstand extreme temperatures and applications.

Construction

- Resistance wire wound in a spiral, around a flexible fibreglass core or bunched resistance wire. Silicone or PTFE insulation with other options available on request.
- A braid, sheath, and optional thermostat control are also available.
- Our custom-made PTFE insulated heating cable meets Standard IEC60800 Ed 3.0 2009-07 (Heating cables with a rated voltage of 300/500V for comfort heating and prevention of ice formation).
