INVESTMENT OBJECTIVE

A global flexible multi-asset fund with a dynamic asset allocation, the result of a long-term macroeconomic analysis combined with systematic models and short- to medium-term trend analysis. The portfolio is extremely active and adopts, when necessary, very decisive positioning that deviates significantly from the traditional 50-50 strategic balanced. Its investment policy allows it to invest globally in bonds and equities, with the weight of both asset classes varying between 25% and 75%. The fund's objective is to participate in the financial markets through a preponderant allocation in risky assets during periods of economic expansion and a more conservative allocation during adverse market phases.
