INVESTMENT OBJECTIVE

A fund whose goal is capital growth through a steady stream of income primarily by means of bond coupons but also through equity dividends. The fund invests primarily in medium-term bonds, generally global investment grade corporate bonds, however, with the possibility of investing in High Yield up to 60% of the fund. As far as equity exposure is concerned, up to a maximum of 15% of the fund, high-quality global companies with a long track record of constant dividend payout are selected. The construction of the ideal asset allocation arises from the perfect mix of the two approaches, top-down and bottom-up, with the aim of increasing capital while minimising market volatility.
