

Protect Your Property 24/7 with Mobile Surveillance Units

Mobile Surveillance Units provide instant, high-performance security coverage wherever permanent infrastructure isn't available.

Designed for rapid deployment, each unit combines AI-powered video monitoring with live remote guarding to actively deter threats and protect property in real time.

What's Included

- Live monitoring by trained operators
- Real-time talk-down capability
- AI Operator Intelligence for Real-Time Threat Detection
- High-intensity lighting and audible deterrents
- Cellular connectivity
- Solar/battery power options

Hakimo

Key Advantages

Live Human Monitoring

Most mobile units only stream video. Hakimo MSUs are monitored by trained live operators who verify activity and intervene in real time.

Supports Your Security Team

MSUs add coverage and intelligence to existing guards, helping them respond faster and more effectively.

Built-In Deterrence

High-visibility towers, lighting, and live voice talk-down stop incidents before they escalate.

Solar-Powered & Self-Sustaining

Designed for temporary and remote sites, our MSUs run independently with solar power and cellular connectivity.

Key Features to Strengthen Your Security

Eight components. One complete security unit. The Hakimo MSU combines a custom camera system, 22-foot telescopic mast, solar power array, 4G/5G cellular connectivity, Starlink support, blue LED strobe deterrence, live talk-down speaker, and a weather-sealed equipment enclosure, all in a single towable unit.

Features	Mobile Surveillance Unit
Mast Height (fully extended)	22'0"
Mast Lowered	9'6"
Length	7'5"
Width	5'0"
Width w/ outriggers extended	6'8"
Weight	1,900 lbs
Power	Option to plug in to 24V on-board battery charger
Light	Blue LED strobe light
Audio	Talk down speaker
Towing	Standard 2" Hitch ball
Wireless Communications	4G/5G LTE Wireless broadband with cellular router
	900MHz WiFi for directional and non-directional application
	Configured to support Starlink satellite service (Requires client Starlink account)
Cameras	4 Cameras, customizable mix of camera solutions (PTZ, Dome, Bullet, or Thermal, must be NDAA Compliant)

Options	Mobile Surveillance Unit
Infrared Motion Sensors	✓
High Efficiency LED Lights	✓
Archiving/Time-Lapse Services	✓
Event-Based Video Monitoring	✓
Solid State Drive	✓
Intelligent Video Analytics (IVA)	✓
Unit Relocation Service	✓
Scheduled Refueling Plan	✓
Maintenance Package	✓

Why Hakimo vs Typical Mobile Surveillance Units

Most Mobile Surveillance Units are passive. They record footage and send alerts after something happens. Hakimo Mobile Surveillance Units are built to prevent incidents, not just document them. By combining AI detection with trained live monitoring agents, Hakimo verifies threats in real time and intervenes immediately through voice talk-down, lighting, and coordinated response.

Instead of overwhelming you with motion alerts and false alarms, Hakimo filters activity intelligently, so you only get notified when something actually needs attention. That means faster responses, fewer disruptions, and stronger protection for your property.

What this means for you

- Faster threat detection and intervention
- Actionable alerts and unnecessary dispatches
- Active deterrence that stops incidents early
- Lower security costs compared to guards alone
