

JERRA[®]
FITNESS EQUIPMENT

The logo is displayed on a black, textured horizontal bar. The word "JERRA" is in large, bold, white capital letters with a red outline. Below it, "FITNESS EQUIPMENT" is written in smaller, white capital letters. A red diagonal line separates the brand name from the descriptor. A registered trademark symbol (®) is located above the "A".

Established in the year 1994, Jerai Fitness Ltd. Is proud to have become a market leader in the indian fitness industry with three decades of experience. Our aim is to be able to provide quality and affordable fitness solutions to all sectors of society. Through the fit india movement, we strive to foster health and wellness to everyone around the country to the best of our capacity.

Our vision is to deliver well - designed, biomechanically accurate fitness equipment of the highest standards, and we achieve this through a fully automated manufacturing process that assures safety and quality. With the help of japanese production infrastructure and a great team of in-house engineers and experts we fulfill this vision. We take pride in the extensive range of equipment we have to offer and the service we deliver through our sales and after - sales teams.

The organization proudly adheres to the make in india movement and thereby helps promote a better standard of living for all. We sponsor national and international bodybuilding championships and take an active part in exhibitions and other platforms. Jerai Fitness not only boasts showrooms and offices pan india but also extends itself globally by maintaining a presence in over 35 countries.

Jerai Fitness has set a benchmark for integrity and ethics, whilst setting the highest standards for design, quality, service and innovation.

JX-FIT

SERIES

The JX - FIT Series is a versatile range of functional training equipment designed to elevate your workout experience. From multi - gyms and jungles to rigs, racks, and training cages, it covers all your fitness needs. Each piece is rigorously tested to deliver top - tier performance, reliability, and safety — perfect for high - intensity training environments.

MULTI GYM (UPPERBODY) J4MGU

- 📏 L : 152 inches / 386 cms
- W : 85 inches / 216 cms
- H : 92 inches / 234 cms

- 📋 Pec Fly / Rear Delt : 220 lbs / 100 kg
- Lat Pull Down : 220 lbs / 100 kg
- Long Pull Row : 220 lbs / 100 kg
- High Low Pulley : 220 lbs / 100 kg

This all-in-one upper body station is designed to target key muscle groups with precision, control, and ease. Featuring a combination of strength - focused movements, it enables users to build balanced upper body strength through efficient, focused training. The Pec Fly / Rear Delt station effectively isolates the chest and rear shoulder muscles for a well - rounded upper body workout, while the Lat Pull Down engages the back and biceps, promoting proper posture and functional strength. The Long Pull Row delivers a controlled horizontal pulling motion to develop a strong, defined back, and the High - Low Pulley system allows for a wide range of cable exercises that target the shoulders, arms, and core. Engineered for smooth performance, ergonomic alignment, and user comfort, this station is an ideal solution for both beginners and advanced users looking to optimize their upper body training.

*Attachments, Accessories, Weight Plates, Dumbbells & Bars to be Ordered Separately

MULTI GYM WITH SEATED LEG CURL / EXTENSION COMBO.

J4MGC

- L : 85 inches / 216 cms
 W : 115 inches / 292 cms
 H : 92 inches / 234 cms
- Pec Fly / Rear Delt : 220 lbs. / 100 kg
 Lat Pull Down : 220 lbs. / 100 kg
 High Low Pulley : 220 lbs. / 100 kg
 Seated Leg Curl / Ext. Combo : 220 lbs. / 100 kg

A versatile all - in - one strength station designed for comprehensive upper and lower body training, this unit effectively isolates the chest and rear shoulder muscles with its pec fly / rear delt feature, engages the back and biceps through the lat pulldown while promoting proper posture, and offers a high - low pulley system for a wide range of cable exercises targeting the shoulders, arms, and core. The seated leg curl / extension combo allows for focused strengthening of both the hamstrings and quadriceps. Ideal for both commercial gyms and high-end home setups, this machine ensures smooth biomechanics, ergonomic seating, and durable construction for intense and consistent workouts.

MULTI GYM (LOWERBODY)

J4MGL

- L : 115 inches / 292 cms
 W : 95 inches / 241 cms
 H : 80 inches / 203 cms
- Leg Extension : 220 lbs. / 100 kg
 Seated Leg Curl : 220 lbs. / 100 kg
 Seated Leg Press : 400 lbs. / 180 kg
 Standing Calf : 220 lbs. / 100 kg

A compact yet powerful lower-body training station designed for complete leg development, this machine combines Leg Extension to target the quadriceps with adjustable angles for optimal muscle engagement, Seated Leg Curl to isolate the hamstrings for controlled, effective reps, Seated Leg Press for a joint - friendly movement path that builds strength in the glutes, quads, and hamstrings, and a Standing Calf attachment for focused calf training in a natural upright posture — engineered for comfort, stability, and performance.

5 STATION MULTI GYM

J5MG

- 📏 L : 218 inches / 554 cms
- 📏 W : 115 inches / 292 cms
- 📏 H : 92 inches / 234 cms
- 📏 220 lbs. / 100 kg X 5 Stacks

A space - efficient, full-body training solution designed for versatility and performance, this 5 - station multi - gym allows multiple users to train simultaneously, making it ideal for commercial setups and premium fitness spaces. With durable construction, ergonomic design, and seamless performance, it's engineered for serious training in minimal space. The Pec Fly / Rear Delt station effectively isolates the chest and rear shoulder muscles for a balanced upper body workout, while the Lat Pull Down engages the back and biceps, promoting proper posture and strength. The Long Pull Row provides a seated row setup with footplates and low pulley positioning for full - range lat and mid - back activation. The High - Low Pulley supports versatile cable exercises for shoulders, arms, and core engagement, and the Cable Crossover features dual adjustable pulleys with extended arms to enable a wide range of motion for functional strength training.

4 STATION MULTI GYM & 4 STATION JX - FIT J8XMG

- 📏 L : 192 inches / 488 cms
- 📏 W : 115 inches / 292 cms
- 📏 H : 92 inches / 234 cms
- 📏 220 lbs. / 100 kg X 5 Stacks

A powerful fusion of strength, functional, and combat training — all in a space - efficient, all - In - one station. Designed for commercial gyms and group workout zones, this compact system maximizes training variety without compromising on floor space. Whether you're building muscle, boosting endurance, or engaging in high-intensity group circuits, this station delivers a complete full - body training experience. It features strength training stations including Pec Fly / Rear Delt, Lat Pulldown, Long Pull Row, High - Low Pulley, and Cable Crossover. Functional and combat fitness are elevated with a heavy - duty boxing bag and connector, TRX suspension training hook, power pivot (landmine trainer), battle rope anchor, and a versatile open space for dynamic movements. Bodyweight workouts include a vertical ladder, elevated step - up platform, and parallel dip bars. Integrated storage solutions like a kettlebell rack and medicine ball shelf keep the area organized and efficient. Engineered for durability, performance, and seamless group training.

JX - FIT MULTI JUNGLE

JXMJ

- 📏 L : 324 inches / 823 cms
- W : 120 inches / 305 cms
- H : 92 inches / 234 cms

An all - in - one powerhouse designed for group training zones, strength circuits, and performance - focused gyms, the JX - FIT Multi Jungle combines the best of strength, functional, and combat training in one compact, heavy - duty setup. Built for performance and crafted for versatility, this modular unit supports multiple users and training styles simultaneously, maximizing floor space while delivering serious results. It features 4 Half Racks for safe and efficient barbell training, a Vertical Ladder for climbing drills and full - body coordination, and a Horizontal Monkey Ladder for grip strength, agility, and core engagement. Functional training is enhanced with TRX attachments, 4 Versa tools for varied resistance workouts, a Power Pivot (Landmine) for rotational strength, and a Battle Rope Station for high - intensity conditioning. For combat training, the included boxing bag adds cardio and striking versatility. Bodyweight and explosive training are supported with Parallel Dip and Step - Up attachments, while smart storage solutions — like bar holders, a kettlebell rack, and an accessories rack — keep the space organized. A High - Low Pulley Attachment adds seamless cable movement for targeted isolation work, making this system a complete, performance-driven centerpiece for any advanced training facility.

8 STATION MULTI GYM & 4 STATION JX - FIT

J12XMG

- 📏 L : 264 inches / 671 cms
- 📏 W : 240 inches / 610 cms
- 📏 H : 92 inches / 234 cms
- 📏 220 lbs. / 100 kg X 9 Stacks

A powerhouse of performance and space efficiency, this integrated training system combines strength machines, functional tools, and combat - ready features — all in one robust setup. Ideal for commercial gyms, boutique studios, and elite training zones, it enables multiple users to train simultaneously across a wide range of disciplines. The strength stations include Pec Fly / Rear Delt for balanced upper body development, Lat Pull Down to engage the back and biceps while promoting posture, Long Pull Row for full-range mid - back activation, and Cable Crossover with dual adjustable pulleys for functional strength training. The Assisted Dip Chin station allows progressive strength gains through supported dips and chin - ups, while the Seated Leg Curl / Extension Combo targets both hamstrings and quadriceps with precision. Functional and combat training are elevated with a Boxing Bag and Connector for dynamic endurance work, a Vertical Ladder for mobility and climbing drills, a High - Low Battle Rope Anchor for cardio - intensive sessions, and a Power Pivot for core - driven rotational lifts. The TRX Attachment enables scalable bodyweight exercises, supported by dual Parallel Dip Attachments and a Step - Up Attachment for explosive lower - body training. An open Versa Space supports free movement, agility drills, and group circuits, while integrated Kettlebell and Medicine Ball Racks keep functional tools organized and accessible — making this unit a complete solution for serious, versatile training.

PERSONAL TRAINING STATION

JPTS

-  L : 100 inches / 254 cms
 W : 88 inches / 224 cms
 H : 90 inches / 229 cms
-  220 lbs. / 100 kg X 3 Stacks

Engineered for serious fitness enthusiasts, this advanced personal training unit is perfect for those seeking a full - body workout from a single machine. Featuring three independent weight stacks, it allows multiple users to train simultaneously without compromising performance. The integrated Smith Machine offers enhanced safety and support for beginners while delivering the strength and stability required for heavy, intense sessions. Dual adjustable cable stations open up endless exercise possibilities, catering to both functional and strength training. With a dedicated weight stack for lat pulldown and long pull row, this machine maximizes versatility, making it an ideal addition to any commercial or premium home gym setup.

Optional Attachment*

4 SIDE HIGH LOW PULLEY J4MP

- 📏 L : 58 inches / 147 cms
- 📏 W : 58 inches / 147 cms
- 📏 H : 92 inches / 234 cms
- 📏 220 lbs. / 100 kg X 4 Stacks

*Attachments, Accessories, Weight Plates, Dumbbells & Bars to be Ordered Separately

The 4 - Side High - Low Pulley is a versatile strength training station designed to support a wide variety of exercises. Featuring four independent pulley stations, it allows multiple users to train simultaneously while targeting different muscle groups from multiple angles. The combination of high and low pulley setups makes it ideal for both upper and lower body workouts. Built for durability and smooth motion, this machine delivers consistent resistance for a seamless training experience. Perfect for functional training zones and strength circuits.

FOREARM JUNGLE

JFJ

- ❑ L : 60 inches / 152 cms
- W : 60 inches / 152 cms
- H : 48 inches / 122 cms

The Forearm Jungle is a dedicated training station designed to build forearm strength, enhance grip endurance, and improve overall arm functionality. Engineered with multiple grip variations and exercise options, it allows users to target different muscles in the forearm through a range of dynamic and static movements. Its durable design ensures stability and smooth operation for high - repetition use, making it a valuable addition to any serious strength training setup.

BATTLE ROPE JUNGLE

JXBRJ

- ❑ Dia : 20 inches / 51 cms
- H : 14 inches / 36 cms

Engineered for dynamic functional training, the Battle Rope Jungle offers multiple anchor points, allowing a wide range of Battle Rope exercises. Ideal for high - intensity workouts, it helps improve upper body strength, core stability, and cardiovascular endurance, making it a versatile addition to any training space.

SLEDGE JXS

- 📏 L : 30 inches / 76 cms
- W : 30 inches / 76 cms
- H : 20 inches / 51 cms

Take your functional training to the next level with the JX-Fit Sledge — built for durability, performance, and intensity. Engineered for full-body conditioning, this versatile tool allows for a variety of dynamic exercises that develop strength, power, and explosive movement. Its robust construction and ergonomic design ensure reliable performance across high-impact training sessions, making it an essential addition to any strength and conditioning setup.

STRETCH TRAINER JST

- 📏 L : 59 inches / 150 cms
- W : 31 inches / 79 cms
- H : 43 inches / 109 cms

Engineered with ergonomic design and adjustable settings, this equipment enables precise, controlled stretching for every major muscle group. Ideal for warm-ups and dedicated flexibility sessions, it helps improve mobility, prevent injuries, and boost overall athletic performance, making it a vital addition to any fitness space.

TYRE LIFT

JTL

- ☑ Dia : 50 inches / 127 cms
- H : 40 inches / 102 cms

The Tyre Lift is the perfect fusion of strength and cardio training, designed to deliver explosive, full - body workouts that engage every major muscle group. From building raw power and endurance to enhancing functional strength, it supports a wide range of dynamic movements — all within a compact footprint ideal for both gym floors and home setups. Its smart design allows resistance to be easily adjusted with weight plates, making it suitable for all fitness levels and adaptable to individual progress. Exercise variations include Tyre Flips, Plyometric Jumps, Step - Ups, Push - Ups, and Heavy Rope Drills, offering a versatile, high - intensity training experience in a single piece of equipment.

STRETCH CAGE

JSC

- ❑ L : 60 inches / 153 cms
- W : 48 inches / 122 cms
- H : 87 inches / 221 cms

Elevate your mobility training with the Stretch Cage by JX - Fit. Designed for users of all fitness levels, this robust and versatile unit supports a wide variety of stretching movements. Its durable cage structure and adjustable components allow for safe, targeted flexibility work across all major muscle groups. Perfect for enhancing recovery, reducing injury risk, and improving overall athletic performance.

VERTICAL JX - FIT JXV

📏 L : 95 inches / 241 cms
W : 91 inches / 231 cms
H : 122 inches / 311 cms

The Vertical JX - Fit is a cutting-edge solution for functional fitness. Designed for maximum versatility, this premium equipment supports a wide array of full-body workouts, helping users build strength, improve mobility, and enhance overall performance. Its robust construction and multi-functional features make it a standout addition to any modern training space.

SHAPE XX

JXSXX

- 📏 L : 295 inches / 749 cms
- 📏 W : 125 inches / 318 cms
- 📏 H : 96 inches / 243 cms
- 📦 220 lbs. / 100 kg X 2 Stacks

Unleash the full potential of your training zone with SHAPE XX - a powerhouse multi-station rig designed for dynamic, high-intensity workouts within a compact footprint. Built with commercial-grade materials and engineered for lasting durability, SHAPE XX is the ultimate all-in-one solution for gyms that prioritize performance and versatility. This multifunctional system features 4 Functional Training Stations that support varied movement patterns, a Dual Adjustable Pulley (DAP) system for resistance-based workouts, and a Half Rack setup for heavy lifts. It also includes a dedicated Boxing Bag space with a connector and bag for striking drills, as well as Dip and Step-Up attachments to build both upper- and lower-body strength. The T-Bar attachment enables rotational and pulling exercises, while the integrated Rebounder offers a platform for explosive training. For metabolic conditioning, the Battle Rope connector delivers high-intensity cardio options. The Suspension Chin Bar with TRX® attachment and Rock Grip Chin Bar cater to bodyweight training and grip development, while the Monkey Bar Connector enhances agility and coordination. Organized storage is built-in, with Kettlebell and Medicine Ball racks, along with Bar Catch connectors for Olympic lifting setups. Complete with straps and bicep / tricep handles for focused cable work, SHAPE XX is a space-smart, performance-driven centerpiece for any serious training environment.

SHAPE O JXSO

- 📏 L : 141 inches / 358 cms
- 📏 W : 137 inches / 348 cms
- 📏 H : 96 inches / 243 cms
- 📦 220 lbs. / 100 kg X 2 Stacks

Engineered for high - performance group or individual training, SHAPE O is a modular functional training rig that fuses strength, cardio, and conditioning into one streamlined setup. Compact yet comprehensive, it's built for gyms that demand maximum versatility without compromising on space. The robust frame features multiple anchor points, making it ideal for integrating battle ropes, suspension trainers, and resistance bands into high-intensity routines. SHAPE O includes 4 functional training stations designed for dynamic, full - body movement and a Dual Adjustable Pulley (DAP) system with dual 100 kg weight stacks for resistance-based exercises. A Half Rack supports safe, effective compound lifts, while dedicated space, a connector, and a boxing bag elevate striking sessions. The Dip and Step-Up attachments provide targeted upper - and lower -body strength training, and the T-Bar attachment enables rotational and pulling movements for core development. The integrated rebounder adds explosive power drills to your training options, while the battle rope connector enhances metabolic conditioning. For bodyweight and agility - focused workouts, SHAPE O offers a suspension chin bar with TRX® attachment, a rock grip chin bar, and a monkey bar connector. Smart storage is built in, with kettlebell and medicine ball racks, bar catch connectors for barbell safety, and accessory cable handles including strap and bicep / tricep options. SHAPE O is the ultimate performance hub for modern, space-conscious training environments.

SHAPE T JXST

L : 185 inches / 470 cms
 W : 124 inches / 315 cms
 H : 96 inches / 243 cms

The SHAPE T is a multifunctional training rig built for both dynamic group sessions and focused individual workouts. Crafted with premium-grade materials and engineered with smart ergonomics, it supports a wide spectrum of strength, conditioning, and functional movements — all within a compact, space - saving footprint. Whether the goal is building endurance, enhancing core stability, improving coordination, or developing explosive power, SHAPE T delivers a well - rounded training solution that seamlessly adapts to different intensities and spatial demands. Equipped with 3 functional training stations, SHAPE T promotes full-body movement and training variety. The integrated Half Rack enables safe and effective barbell -based strength training, while the Rebounder space and connector offer explosive power and agility drills. A dedicated Boxing Bag space with connector and bag adds a combat - style cardio element to the setup. Functional features include Dip and Step - Up attachments for bodyweight and plyometric exercises, a T - Bar attachment for rotational and pulling movements, and a Battle Rope connector with rope for high - intensity conditioning. For bodyweight versatility, the Suspension Chin Bar with TRX® attachment allows scalable training, and the Monkey Connector adds agility and upper - body coordination elements. Kettlebell and Medicine Ball racks provide organized, accessible storage, while the Bar Catches connector ensures safety during barbell lifts. SHAPE T is a powerful, adaptable training station designed to meet the evolving needs of modern fitness spaces.
