CKD 1–5

plus dialysis & transplant

500K+

foods with nutrient data

PROOF POINTS

- ✓ **One-click patient summaries before every visit**
Doctor-Ready Reports turn weeks of logs into one view.
- ✓ **Led by Ruth Kander, specialist renal dietitian**
Every recipe and guidance note is dietitian-reviewed.
- ✓ **Aligned to KDIGO 2024 & NKF KDOQI**
Guidance mirrors the standards your team already works to.
- ✓ **Every stage: CKD 1–5, dialysis, transplant**
One platform across the full patient journey.
- ✓ **Priced so your savings outweigh your spend**
Licensed per patient or per member, scaled to your cohort.

WHAT YOUR PATIENTS GET

- **Nutrient tracking**
Potassium, phosphorus, sodium, protein and fluid, logged daily.
- **Barcode scanning**
Instant kidney-safe checks on packaged foods in store.
- **Recipe library**
Dietitian-reviewed meals, filtered to their stage.
- **Personalised recipe books**
Premium kidney-friendly cookbooks included.
- **AI assistant**
Answers everyday diet questions between visits.
- **Health metric logging**
Labs, weight and BP in one timeline.

HOW IT WORKS

1 Onboard your cohort in days

We issue premium access codes and co-branded invites. No IT integration needed to start.

2 Guidance, recipes & tracking for patients

Stage-specific support keeps diet and adherence on track between appointments.

3 Consultations start from real data

Patients share a Doctor-Ready Report, so time goes on decisions, not recall.

BUILT FOR

Renal clinics

More from every consult
Prescribe to patients; arrive at appointments with a summary already in hand.

Insurers

Slow costly progression
Per-member licensing that supports self-management and adherence at scale.

Pharma

Reach engaged patients
Patient education, research recruitment and real-world insight, consent-led.

Employers

Support staff with CKD
A condition-specific benefit that plugs into existing wellbeing programmes.

Clinically led, not just clinically reviewed

Ruth Kander, specialist renal dietitian and Clinical Lead, heads an advisory team with a nephrologist and dietitian.

Clinical firewall

Commercial partners never influence patient recommendations. Data handled under UK GDPR.

See what Kidney Ally can do for your patients.

We'll map a pilot to your cohort, stage mix and budget.
