# *A* Secure Web *Gateway*

## Why stop over when you can fly direct?

dope.security is your new secure web gateway. We eliminated the "stopover" data center with an on-device SSL-inspection proxy endpoint that supports HTTP/2, providing increased privacy, reliability, and performance. Enjoy a direct internet flight instantly and never worry about data center outages again.

### Discover your externally shared OneDrive / Google Drive files

One-click authorization instantly crawls your company's tenant and classifies all externally shared files containing PII, PCI, PHI, Intellectual Property, or just "Other" Public files. There are no policies and no configurations required!

**DOP**AMINE

This is a datasheet describing a new SWG (Secure Web Gateway) by dope.security. It's safe for public share and does not contain any sensitive information.

### The Dopamine Summary, our AI-Powered DLP for data at rest

CASB Neural provides a highly precise human-readable document summary alongside any sensitive data extractions. Upgrade your old-school DLP regexes and pattern matching with LLMs, and experience fewer false positives than ever before.

### One-click remediation straight from the console

From passport numbers to HIPAA data, every sensitive data discovery—*or dopamine hit*—can be made private or reviewed with the click of a button. It's all part of our signature dope experience.

**SSPM** COMING SOON / DLP

### Discover what apps are authorized to access your Microsoft 365 / Google via API

Uncover all third-party apps connected to your Microsoft 365 or Google SaaS tenant, neatly organized by access type: global, limited, or login access. Review detailed data such as app access start date, app access capabilities, and user info. And, as always, it's just one click to revoke access.

**DOPE** = *PASSION*. Design. Attention to detail. That's the difference with our on-device proxy, the Fly-Direct SWG. Paired with CASB Neural, the LLM-powered DLP, we build beautifully designed enterprise cybersecurity. So whether your company is small or large, you get a first-class experience.

It's not that we're mad at yesterday's solutions—just disappointed. So we made it better. We made it easier. *We made it dope.*
